Charter schools are publicly funded schools that have the flexibility to operate outside normal district control. They are designed to provide greater educational choice to families, reduce bureaucratic constraints on educators, and provide competitive pressure to induce improvement in conventional public schools while remaining publicly accountable. This document reports on an evaluation of the legislatively mandated (under SB 740) process of evaluating California's nonclassroom-based (NCB) charter schools, in which instruction generally takes the form of independent study, home study, or some

combination of these two with classroom-based instruction. The report concludes that the impact of SB 740 has been significant and largely in accordance with the explicit goals of the legislation. However, despite the financial savings to the state and adaptations on the part of NCB charter schools to the requirements of SB 740, the success of the legislation as a mechanism for improving education for California students is unclear, and it may have had some harmful as well as beneficial effects. SB 740 has sent a strong and important message to NCB schools that they must be careful regarding the ways in which they use resources or face strong sanctions. But the regulations need to be reshaped to fit a newly acquired understanding of how these schools operate within the context of all public education and to serve the needs of students more effectively.

The Christians is the history of Christianity, told chronologically, epoch by epoch, century by century, beginning at Pentecost and concluding with Christians as we find ourselves in the twenty-first century. It will consist of approximately twelve volumes, produced over a 10-year period at the beginning of the third Christian millennium. It is written and edited by Christians for Christians of all denominations. Its purpose is to tell the story of the Christian family, so that we may be knowledgeable of our origins, may well know and wisely profit from the experiences of our past both good and

bad, and may find strength and inspiration to face the challenges of our era from the magnificent examples set for us by those who went before. - Back cover. material. From the author of *House of Outrageous Fortune* For seventy-five years, it's been Manhattan's richest apartment building, and one of the most lusted-after addresses in the world. One apartment had 37 rooms, 14 bathrooms, 43 closets, 11 working fireplaces, a private elevator, and his-and-hers saunas; another at one time had a live-in service staff of 16. To this day, it is steeped in the purest luxury, the kind most of us could only imagine, until now. The last great building to go up along New York's Gold Coast, construction on 740 Park finished in 1930. Since then, 740 has been home to an ever-evolving cadre of our wealthiest and most powerful families, some of America's (and the world's) oldest money—the kind attached to names like Vanderbilt, Rockefeller, Bouvier, Chrysler, Niarchos, Houghton, and Harkness—and some whose names evoke the excesses of today's monied elite: Kravis, Koch, Bronfman, Perelman, Steinberg, and Schwarzman. All along, the building has housed titans of industry, political power brokers, international royalty, fabulous scam-artists, and even the lowest scoundrels. The book begins with the tumultuous story of the building's construction. Conceived in the bubbling financial, artistic, and social cauldron of 1920's Manhattan, 740 Park rose to its dizzying heights as the stock market plunged in 1929—the building was in dire financial straits before the first apartments were sold. The builders include the

architectural genius Rosario Candela, the scheming businessman James T. Lee (Jacqueline Kennedy Onassis's grandfather), and a raft of financiers, many of whom were little more than white-collar crooks and grand-scale hustlers. Once finished, 740 became a magnet for the richest, oldest families in the country: the Brewsters, descendants of the leader of the Plymouth Colony; the socially-registered Bordens, Hoppins, Scovilles, Thornes, and Schermerhorns; and top executives of the Chase Bank, American Express, and U.S. Rubber. Outside the walls of 740 Park, these were the people shaping America culturally and economically. Within those walls, they were indulging in all of the Seven Deadly Sins. As the social climate evolved throughout the last century, so did 740 Park: after World War II, the building's rulers eased their more restrictive policies and began allowing Jews (though not to this day African Americans) to reside within their hallowed walls. Nowadays, it is full to bursting with new money, people whose fortunes, though freshly-made, are large enough to buy their way in. At its core this book is a social history of the American rich, and how the locus of power and influence has shifted haltingly from old bloodlines to new money. But it's also much more than that: filled with meaty, startling, often tragic stories of the people who lived behind 740's walls, the book gives us an unprecedented access to worlds of wealth, privilege, and

extraordinary folly that are usually hidden behind a scrim of money and influence. This is, truly, how the other half—or at least the other one hundredth of one percent—lives. Drawing on textual, iconographic and archaeological evidence, this book highlights a historically documented (but often ignored) instance, where five single women were elevated to a position of supreme religious authority. The women were Libyan and Nubian royal princesses who, consecutively, held the title of God's Wife of Amun during the Egyptian Twenty-third to Twenty-sixth dynasties (c.754-525 BCE). At a time of weakened royal authority, rulers turned to their daughters to establish and further their authority. Unmarried, the princess would be dispatched from her father's distant political.
