This book investigates the phenomenon of permanent campaigning in Greece over the last decade. It explores the political communication strategies of three recent successive Greek prime ministers from 2012 until the early months of 2022 to deal with economic, migration and pandemic crises, from a permanent campaigning perspective. Moreover, it evaluates and measures, for the first time, their permanent campaign strategies using the proposed framework of Lilleker and Joathan (2020) and the three following indicators: capacity building and strategy, paid and owned media and earned media. The need for presidents to communicate with public opinion and their dependence on public support is anything but new. The difference in the case of the permanent campaign is that the campaign tools, methods, techniques and personnel follow the elected leader in office in order to back his constant efforts to retain or even increase public approval as well as advance their re-election prospects. This book aims to extend the research on the permanent campaigning in European parliamentary systems and will be of interest to political communication and campaigning students and researchers. What role do independent institutional investors play in the corporate governance of listed German companies? The authors provide insight into an empirical and qualitative research study, exploring the importance of communication and the role, independence and expertise, responsibilities, influence and monitoring of institutional investors. SMEs need to become more sustainable. To reach such a goal they also need to become more professional in their outlook and approach. In this way they may be able to deal with the instability, complexity, ambiguity and uncertainty of change; and to cope with the ever increasing pressures brought by change. After outlining what is meant by sustainability and professionalism, some strategies for how SME owner/managers might become more professional by focussing on the development of their own, and their employees, so called soft skills are offered. The author draws from a range of theories to support the argument. Within international law there is no unified concept of peace. This book addresses this gap by considering the liberal conception of peace within Western philosophy alongside the principle of 'peaceful coexistence' supported in the East. By tracing the evolution of the international law of peace through its historical and philosophical origins, this book investigates whether there is a 'right to peace'. The book explores how existing international law and institutions contribute to the establishment of peace, or how they fail to do so. It sets out how international law promotes the negative dimension of peace-the absence of violence-as well as its positive dimension: the presence of underlying conditions for peace. It also investigates whether international actors and institutions have particular obligations in relation to the establishment and maintenance of peace. Discussions include: the relationships between the different regimes of human rights, trade, development, the environment, and regulation of arms trade with peace; the role of women, refugees, and other groups seeking equal treatment; the role of peacekeepers, transitional justice mechanisms, international courts fact-finding missions, and national constitutional frameworks in upholding peace in practice; and how civil society participates in the promotion and safeguarding of peace. The book's comprehensive treatment of the concept of peace in international law makes it an ideal reference work for those working in the field, as well as for students. How has the economic and financial crisis that started in 2007 affected European integration? Observers have been speculating about whether the crisis will ultimately lead to a strengthening or weakening of the European Union. This book studies the effects of the crisis on EU policy-making and institutional arrangements on one hand, and citizens' EU attitudes and political parties' electoral strategies on the other. It concludes that, at least in the short run, the crisis has overall created an opportunity for European integration rather than an obstacle. First, it has triggered events of proposed and actual far-reaching policy and institutional change. Second, negative effects on public opinion have not (yet) systematically translated into tendencies of stagnation or disintegration. The book brings together established scholars of European integration whose diverse research expertise contributes to an improved theoretical and empirical understanding of how the economic and financial crisis has affected EU policies, institutions and citizens. This book was published as a special issue of the Journal of European Integration. This book gives a personal insight into the hearts and minds of a fundamentalist Christian sect, the Open Brethren. Using Brethren magazine articles, obituaries, and testimonies, Peter Herriot argues that the Brethren constitute a perfect example of a fundamentalism. Their culture is entirely opposed to the beliefs, values, and norms of modernity. As a result, like other fundamentalisms they challenge modern Christianity and impede its efforts to engage with global society. This book presents unique management perspectives from Thailand's Healthcare Industry. It focuses on the areas of Personal Knowledge Management, Leadership Styles and Organisational Performance. The book highlights the various business challenges that organisations face in the context of globalisation, which itself has produced new opportunities and difficulties alike. In addition, it also elaborates on how even large organisations with strong histories can no longer compete unless they are willing to adapt to changing conditions. Demonstrating how transferring and encouraging knowledge within an organisation can generate approaches that promote its continuing success, the book mainly focuses on the perspective of the Resource Based View, a broadly recognised method for maintaining the competitive advantages of an organisation. It also stresses the importance of making the most use of organisational resources. The book offers a valuable reference work, not only for practitioners and academic researchers in the fields of Business & Management but also for students taking Leadership Management, Organisational Learning and Organisational Performance Appraisal courses, serving as a sourcebook for the principles of successful management. A Core Study Text for the CTA Qualification Why do recordings of speakers engaging in reported speech at British Prime Minister's Questions from the 1970s–80s sound so distant to us? This cutting-edge study explores how the practices of quoting have changed at parliamentary question time in light of changing conventions and an evolving media landscape. Comparing data from authentic audio and video recordings from 1978-1988 and 2003-2013, it provides evidence for qualitative and quantitative changes at the micro level (e.g., grammaticalisation processes in the reporting clause) and in more global structures (e.g., rhetorical patterns, and activities). These analytic findings contribute to the theoretical modelling of evidentiality in English, our understanding of constructions, interaction, and change, and of PMQs as an evolving community of practice. One of the first large-scale studies of recent change in an interactional genre of English, this ground-breaking monograph offers a framework for a diachronic interactional sociolinguistic research programme. Regionalism is under stress. The European Union has been challenged by the Eurozone crisis, refugee flows, terrorist attacks, Euroscepticism, and Brexit. In Latin America, regional cooperation has been stagnating. Studying Europe and Latin America within a broader comparative perspective, this volume provides an analytical framework to assess stress factors facing regionalism. The contributors explore how economic and financial crises, security challenges, identity questions raised by immigration and refugee flows, the rise of populism, and shifting regional and global power dynamics have had an impact on regionalism; whether the EU crisis has had repercussions for regionalisms in other parts of the world; and to what extent the impact of stress factors is mediated by characteristics of the region that may provide elements of resilience. Written by specialists from Europe and Latin America with a shared interest in the new field of comparative regionalism, this book will be an invaluable resource for students, scholars and policy specialists in regional integration, European politics, EU studies, Latin American studies, and international relations and international law more generally. A Core Study Text for the ATT Qualification Between 1922 and 1996, over 10,000 girls and women were imprisoned in Magdalene Laundries, including those considered 'promiscuous', a burden to their families or the state, those who had been sexually abused or raised in the care of the Church and State, and unmarried mothers. These girls and women were subjected to forced labour as well as psychological and physical maltreatment. Using the Irish State's own report into the Magdalene institutions, as well as testimonies from survivors and independent witnesses, this book gives a detailed account of life behind the high walls of Ireland's Magdalene institutions. The book offers an overview of the social, cultural and political contexts of institutional survivor activism, the Irish State's response culminating in the McAleese Report, and the formation of the Justice for Magdalenes campaign, a volunteer-run survivor advocacy group. Ireland and the Magdalene Laundries documents the ongoing work carried out by the Justice for Magdalenes group in advancing public knowledge and research into Magdalene Laundries, and how the Irish State continues to evade its responsibilities not just to survivors of the Magdalenes but also in providing a truthful account of what happened. Drawing from a variety of primary sources, this book reveals the fundamental flaws in the state's investigation and how the treatment of the burials, exhumation and cremation of former Magdalene women remains a deeply troubling issue today, emblematic of the system of torture and studious official neglect in which the Magdalene women lived their lives. The Authors are donating all royalties in the name of the women who were held in the Magdalenes to EPIC (Empowering People in Care). Complete Flowchart for CA Inter EIS-SM and CA IPC IT-SM. It has appeared at every stage of the development of every community, regardless of organisation, form of government or period in history. This work presents the views of criminologists from Central Europe on the phenomenon of criminality as a component of social and political reality. Despite the far advanced homogenisation of culture and the coming together of the countries that make up the European Union, criminality is not easily captured by statistics and simple comparisons. There can be huge variation not only on crime reporting systems and information on convicts but also on definitions of the same crimes and their formulations in the criminal codes of the individual European countries. This book fills a gap in the English-language criminological literature on the causes and determinants of criminality in Central Europe. Poland, as the largest country in the region, whose political post-war path has been similar to the other countries in this part of Europe, is subject to an exhaustive and original look at criminality as part of the political and social reality. The authors offer a contribution to the debate in the social and criminal policy of the state over the problems of criminality and how to control it. The European Union referendum of 23 June 2016 proved to be the trigger for the most prolonged period of political turbulence in the peacetime history of the UK; leading to major policy changes and realignments in the party-political system. This book considers from an historical perspective the democratic device that provided the focus for this upheaval. Beginning in the late nineteenth century, it discusses how the idea of using referendums to resolve major political disputes first came onto the agenda, and why. It considers who advocated it, and in what circumstances. The book describes how referendums eventually came into use from the 1970s onwards, and the different patterns in their deployment in the decades that have followed. Major political figures, from Herbert Henry Asquith and Winston Churchill to Clement Attlee, Harold Wilson and Margaret Thatcher; to Tony Blair, David Cameron, and Boris Johnson form part of the story. Governments have come to power and fallen in the context of demands for referendums or the results they produced. The authors provide detailed accounts of each of the 13 major referendums that have taken place. Referendums took place at UK and sub-UK level. They were held on the position of Northern Ireland (1973) and Scotland (2014) within the UK; on devolution to Wales (1979; 1997; 2011) and Scotland (1979; 1979); on the Belfast/Good Friday Agreement (1998); on devolution to London (1998) and North East England (2004); on the parliamentary voting system (2011); and on UK participation in European integration (1975; 1975). The book provides a constitutional and international perspective, and ask how far the original ideas lying behind the referendum were fulfilled in practice.
