The Washington Manual of Hematology and Oncology subspecialty consult has been completely reviewed, revised, and follows the bulleted format and template of The Washington Manual of Medical Therapeutics, 33/e to allow for quick, readily accessible information. This edition has been updated to include new standards in the treatment of malignancies and hematologic disorders, mechanisms of action of new therapeutic agents, and the current use of molecular prognostic factors. The information in each chapter is now presented in a consistent format, with important references cited. The Manual is a practical reference for fellows, residents, and medical students rotating on hematology and oncology subspecialty services. Most of the authors are hematology-oncology fellows or internal medicine residents, the physicians who have recent experience with the issues and questions that arise in the course of training in these subspecialties. Primary care practitioners and other health care professionals also will find this manual useful as a quick reference source in hematology and oncology. Features include: New, templated format same as The Washington University Medical Therapeutics, 33e Contains synopsis of symptoms, signs, and problems encountered in their daily workflow in a bulleted format for quick salient points Includes new standards in the treatment of malignancies and hematologic disorders, mechanisms of action of new therapeutic agents, and the current use of molecular prognostic factors This practical guide gives New Hampshire practitioners quick information on evidence rules and procedures. Study more effectively and improve your performance at exam time with this comprehensive guide. Updated to reflect all changes to the core text, the Eighth Edition tests you on the learning objectives in each chapter and provides answers to

all the even-numbered end-of-chapter exercises. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version. Piping and Pipeline Calculations Manual, Second Edition provides engineers and designers with a quick reference guide to calculations, codes, and standards applicable to piping systems. The book considers in one handy reference the multitude of pipes, flanges, supports, gaskets, bolts, valves, strainers, flexibles, and expansion joints that make up these often complex systems. It uses hundreds of calculations and examples based on the author's 40 years of experiences as both an engineer and instructor. Each example demonstrates how the code and standard has been correctly and incorrectly applied. Aside from advising on the intent of codes and standards, the book provides advice on compliance. Readers will come away with a clear understanding of how piping systems fail and what the code requires the designer, manufacturer, fabricator, supplier, erector, examiner, inspector, and owner to do to prevent such failures. The book enhances participants' understanding and application of the spirit of the code or standard and form a plan for compliance. The book covers American Water Works Association standards where they are applicable. Updates to major codes and standards such as ASME B31.1 and B31.12 New methods for calculating stress intensification factor (SIF) and seismic activities Risk-based analysis based on API 579, and B31-G Covers the Pipeline Safety Act and the creation of PhMSA This practical guide gives New Hampshire practitioners quick information on evidence rules and procedures.
