Bulk Material Handling Sep 09 2021 Tens of thousands of mechanical engineers are engaged in the design, building, upgrading, and optimization of various material handling facilities. The peculiarity of material handling is that there are numerous technical solutions to any problem. The engineer's personal selection of the optimal solution is as critical as the technical component. Michael Rivkin, Ph.D., draws on his decades of experience in design, construction, upgrading, optimization, troubleshooting, and maintenance throughout the world, to highlight topics such as: • physical principles of various material handling systems; • considerations in selecting technically efficient and environmentally friendly equipment; • best practices in upgrading and optimizing existing bulk material handling facilities; • strategies to select proper equipment in the early phases of a new project. Filled with graphs, charts, and case studies, the book also includes bulleted summaries to help mechanical engineers without a special background in material handling find optimal solutions to everyday problems.

David Vizard's How to Port and Flow Test Cylinder Heads Jul 19 2022 Porting heads is an art and science. It takes a craftsman's touch to shape the surfaces of the head for the optimal flow characteristics and the best performance. Porting demands the right tools, skills, and application of knowledge. Few other engine builders have the same level of knowledge and skill porting engine heads as David Vizard. All the aspects of porting stock as well as aftermarket heads in aluminum and cast-iron constructions are covered. Vizard goes into great depth and detail on porting aftermarket heads. Starting with the basic techniques up to more advanced techniques, you are shown how to port iron and aluminum heads as well as benefits of hand and CNC porting. You are also shown how to build a high-quality flow bench at home so you can test your work and obtain professional results. Vizard shows how to optimize flow paths through the heads, past the valves, and into the combustion chamber. The book covers blending the bowls, a basic porting procedure, and also covers pocket porting, porting the intake runners, and many advanced procedures. These advanced procedures include unshrouding valves, porting a shortside turn from the floor of the port down toward the valve seat, and developing the ideal port area and angle. All of these changes combine to produce optimal flow velocity through the engine for maximum power.

A Quest for Justice Aug 20 2022 It's a proverbial battle of David versus Goliath. A senior government employee has been embroiled in a bitter battle against one of the country's largest financiers, Wesbank. His Story is mired in alleged fraud, corruption and misconduct. The Grahamstown High Court this week dismissed with costs an appeal by Wesbank, a division of FirstRand – for the third time – against earlier rulings made in favour of Mzukisi Ndara. In the pursuit for justice, Ndara has approached several high-ranking politicians, Parliament as the custodian of the country's laws, the Hawks and the courts. But 15 years into the battle, the matter has yet to be resolved. And some dockets containing vital evidence have gone missing. Ndara has now turned to the Director of Public Prosecutions as a last resort. – Long and Winding Road for Justice: Bulelwa Payi; Weekend Argus, March 19, 2019 Based on your statement, together with police evidential material and the circumstances of this matter, Wesbank and or its employees breached the contract in the form of misrepresentations and acted in violation of various statutes as alluded to in your reports. – National Director of Public Prosecutions (NDPP) Advocate Shamila Batohi; September 24, 2019 Your story needs to be told for business and government to understand they can't keep turning a blind eye to their people who believe the end justifies the means regarding profit making. – Professor Thuli Madonsela; June 4, 2020 A seventeen year journey of sheer guts and resilience... - Dr Charity Hove October 6, 2021 It is a baffling, bewildering and unsettling story best summarized by your insightful self-observation (Part One: page 31), 'my inner desire for truth'. You write with fluency and power, the first part of your account, embracing your earlier life, is amusing, wry, entertaining and in parts engrossing. The later parts make for more challenging reading, because of the anguish of the cumulating injustices, delays, lawyerly and institutional disingenuousness and evasions you suffered. Your account is truly a Dickensian tale of the law's delays and obscurities, of lawyers and journalists' evasions, with very occasional light points of courage, loyalty and competence. – Retired Constitutional Court Justice, Edwin Cameron, September 6, 202

While this version features a new Dummies cover and design, the content is the same as the prior release and should not be considered a new or updated product. The top-selling auto repair guide--400,000 copies sold--now extensively reorganized and updated Forty-eight percent of U.S. households perform at least some automobile maintenance on their own, with women now accounting for one third of this \$34 billion automotive do-it-yourself market. For new or would-be do-it-yourself mechanics, this illustrated how-to guide has long been a must and now it's even better. A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs.
