The Ultimate Scene Study Series is a colossal new resource for actors, directors, and acting teachers. The scenes for 3 actors in the volume include

selections from: Antigone by Sophocles, Blood Wedding by Lorca, Hamlet by Shakespeare, Finding the Sun by Albee, Prometheus Bound by Aeschylus, The Wash by Gotanda, The Duck Pond by Watson, and more! A collection of more than one hundred scenes to be performed by two actors. Scott Sedita's Ultimate Guide To Making It In Hollywood lays out everything an actor needs to know to launch and maintain an Acting career in any "Industry City." Tapping into his forty years of experience in the business, renowned Acting Coach, Author, and Motivational Speaker Scott Sedita breaks down the Three Steps to Success: Talent, Confidence and Perseverance, and shows how these elements work together to build and sustain a successful acting career. Further, Scott takes a unique approach in highlighting the many challenges actors face when pursuing their dream in show business. Scott explains how actors must identify and avoid the Three Ways to Sabotage Your Career: Distractions, Addictions and Wrong Actions. With his humorous, no-holds-barred, tough love approach, Scott guides the reader with practical, easily accessible advice, tools and tasks as well as numerous Success Stories of famous actors he's worked with and how they made it to the top! SHOWTIME is the follow-up book to Monologues: Dramatic Monologues For Actors. It contains 16 hilarious comedic scenes for two actors that range from one to ten minutes in length. All of the scenes are original and are taken from selected plays, films, and television pilots from Gregory's body of work. Like Monologues, SHOWTIME was written to fill a much needed void for comedic scenes for black and minority actors; although this book was written for

actors of all races. There are the many unique characteristics in this book that separates it from similar books. The characters can be performed by anyone and there are plenty of scenes for males and females, males and males, older males and younger males, and so on. There are scenes that are appropriate for middle school actors all the way to professional actors. It is the perfect book to produce a show consisting of short comedic scenes for two actors. Also, it is the perfect book for directing funny scenes or shows at high school, colleges, or professional level. SHOWTIME was written to be a comedic actor and director's dream. The characters in each scene allow the actors to explore a different character through: researching, exploring, and understanding the motivation and objective necessary to bring the character to life. For the director, it allows him/her to utilize, enhance, broaden, and develop many of their skills necessary for directing full-scale productions. As a literary resource for educators, SHOWTIME includes: a chapter on vernacular, commonly used vernacular terms, a chapter on copyright infringement, a chapter on stage terminology, a chapter on film/television terminology and more. It is an excellent resource to teach: acting, scene study, and character development. SHOWTIME is original, the characters are diverse, very funny and lots of fun for acting, directing, or teaching. This is one of Shakespeare's darkest comedies, for the romantic story of a young man, Bassanio, who has squandered his fortune and must borrow money to woo the wealthy lady he loves is set against the more disturbing story of the Jewish moneylender Shylock and his

demand for the "pound of flesh" owed him by the Venetian merchant, Antonio. Here pathos and farce combine with moral complexity and romantic entanglement to display the extraordinary power and range of Shakespeare at his best. Each Edition Includes:

- Comprehensive explanatory notes
- Vivid introductions and the most up-to-date scholarship
- Clear, modernized spelling and punctuation, enabling contemporary readers to understand the Elizabethan English
- Completely updated, detailed bibliographies and performance histories
- An interpretive essay on film adaptations of the play, along with an extensive filmography

Newly revised and expanded, the book also includes the author's own assessment of each monologue. Selected scenes and songs from 10 musicals.

The market demands for skills, knowledge and personalities have positioned robotics as an important field in both engineering and science. To meet these challenging - mands, robotics has already seen its success in automating many industrial tasks in factories. And, a new era will come for us to see a greater success of robotics in n- industrial environments. In anticipating a wider deployment of intelligent and auto- mous robots for tasks such as manufacturing, eldercare, homecare, edutainment, search and rescue, de-mining, surveillance, exploration, and security missions, it is necessary for us to push the frontier of robotics into a new dimension, in which motion and intelligence play equally important roles. After the success of the inaugural conference, the purpose of the Second Inter- tional Conference on Intelligent Robotics and

Applications was to provide a venue where researchers, scientists, engineers and practitioners throughout the world could come together to present and discuss the latest achievement, future challenges and exciting applications of intelligent and autonomous robots. In particular, the emphasis of this year's conference was on "robot intelligence for achieving digital manufacturing and intelligent automations." This volume of Springer's Lecture Notes in Artificial Intelligence and Lecture Notes in Computer Science contains accepted papers presented at ICIRA 2009, held in Singapore, December 16-18, 2009. On the basis of the reviews and recommendations by the international Program Committee members, we decided to accept 128 papers having technical novelty, out of 173 submissions received from different parts of the world.

From legendary playwright August Wilson comes the powerful, stunning dramatic bestseller that won him critical acclaim, including the Tony Award for Best Play and the Pulitzer Prize. Troy Maxson is a strong man, a hard man. He has had to be to survive. Troy Maxson has gone through life in an America where to be proud and black is to face pressures that could crush a man, body and soul. But the 1950s are yielding to the new spirit of liberation in the 1960s, a spirit that is changing the world Troy Maxson has learned to deal with the only way he can, a spirit that is making him a stranger, angry and afraid, in a world he never knew and to a wife and son he understands less and less. This is a modern classic, a book that deals with the impossibly difficult themes of race in America, set during the Civil Rights Movement of the 1950s and 60s. Now an

Academy Award-winning film directed by and starring Denzel Washington, along with Academy Award and Golden Globe winner Viola Davis. Winner of the 2003 Pulitzer Prize for Drama, this lush romantic drama depicts a family of cigar makers whose loves and lives are played out against the backdrop of America in the midst of the Depression. Set in Ybor City (Tampa) in 1930, Cruz imagines the catalytic effect the arrival of a new "lector (who reads Tolstoy's Anna Karenina to the workers as they toil in the cigar factory) has on a Cuban-American family. Cruz celebrates the search for identity in a new land. In *The Power of the Actor*, a Los Angeles Times bestseller, premier acting teacher and coach Ivana Chubbuck reveals her cutting-edge technique, which has launched some of the most successful acting careers in Hollywood. The first book from the instructor who has taught Charlize Theron, Brad Pitt, Elisabeth Shue, Djimon Hounsou, and Halle Berry, *The Power of the Actor* guides you to dynamic and effective results. For many of today's major talents, the Chubbuck Technique is the leading edge of acting for the twenty-first century. Ivana Chubbuck has developed a curriculum that takes the theories of the acting masters, such as Stanislavski, Meisner, and Hagen, to the next step by utilizing inner pain and emotions, not as an end in itself, but rather as a way to drive and win a goal. In addition to the powerful twelve-step process, the book takes well-known scripts, both classic and contemporary, and demonstrates how to precisely apply Chubbuck's script-analysis process. *The Power of the Actor* is filled with fascinating and inspiring behind-the-scenes accounts of how

noted actors have mastered their craft and have accomplished success in such a difficult and competitive field. The interest of AI in problems related to understanding sounds has a rich history dating back to the ARPA Speech Understanding Project in the 1970s. While a great deal has been learned from this and subsequent speech understanding research, the goal of building systems that can understand general acoustic signals--continuous speech and/or non-speech sounds--from unconstrained environments is still unrealized. Instead, there are now systems that understand "clean" speech well in relatively noiseless laboratory environments, but that break down in more realistic, noisier environments. As seen in the "cocktail-party effect," humans and other mammals have the ability to selectively attend to sound from a particular source, even when it is mixed with other sounds. Computers also need to be able to decide which parts of a mixed acoustic signal are relevant to a particular purpose--which part should be interpreted as speech, and which should be interpreted as a door closing, an air conditioner humming, or another person interrupting. Observations such as these have led a number of researchers to conclude that research on speech understanding and on nonspeech understanding need to be united within a more general framework. Researchers have also begun trying to understand computational auditory frameworks as parts of larger perception systems whose purpose is to give a computer integrated information about the real world. Inspiration for this work ranges from research on how different sensors can be integrated to models of how humans'

auditory apparatus works in concert with vision, proprioception, etc. Representing some of the most advanced work on computers understanding speech, this collection of papers covers the work being done to integrate speech and nonspeech understanding in computer systems. Auditory Scene Analysis addresses the problem of hearing complex auditory environments, using a series of creative analogies to describe the process required of the human auditory system as it analyzes mixtures of sounds to recover descriptions of individual sounds. In a unified and comprehensive way, Bregman establishes a theoretical framework that integrates his findings with an unusually wide range of previous research in psychoacoustics, speech perception, music theory and composition, and computer modeling. A classic work of American theatre, based on the Scopes Monkey Trial of 1925, which pitted Clarence Darrow against William Jennings Bryan in defense of a schoolteacher accused of teaching the theory of evolution The accused was a slight, frightened man who had deliberately broken the law. His trial was a Roman circus. The chief gladiators were two great legal giants of the century. Like two bull elephants locked in mortal combat, they bellowed and roared imprecations and abuse. The spectators sat uneasily in the sweltering heat with murder in their hearts, barely able to restrain themselves. At stake was the freedom of every American. One of the most moving and meaningful plays of our generation. Praise for *Inherit the Wind* "A tidal wave of a drama."—New York World-Telegram And Sun "Jerome Lawrence and Robert E. Lee were classic Broadway scribes who knew how to crank out serious plays for thinking Americans. . .

. Inherit the Wind is a perpetually prescient courtroom battle over the legality of teaching evolution. . . . We're still arguing this case—all the way to the White House."—Chicago Tribune "Powerful . . . a crackling good courtroom play . . . [that] provides two of the juiciest roles in American theater."—Copley News Service "[This] historical drama . . . deserves respect."—The Columbus Dispatch This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it. The Scene Study Book is a practical, step-by-step guide covering the entire scene process, from the analysis of basic story structure to making choices about physical and psychological action.--[book cover] In the 21st century, actors face radical changes in plays and performance styles, as they move from stage to screen and grapple with new technologies that present their art to ever-expanding audiences.

Active Analysis offers the flexibility of mind, body, and spirit now urgently needed in acting. Dynamic Acting through Active Analysis brings to light this timely legacy, born during the worst era of Soviet repression and hidden for decades from public view. Part I unfolds like a mystery novel through letters, memoirs, and transcripts of Konstantin Stanislavsky's last classes. Far from the authoritarian director of his youth, he reveals himself as a generous mentor, who empowers actors with a brand new collaborative approach to rehearsals. His assistant, Maria Knebel, first bears witness to his forward-looking ideas and then builds the bridge to new plays in new styles through her directing and influential teaching. Part II follows a 21st century company of diverse actors as they experience the joy of applying Active Analysis to their own creative and professional work. "Never before, in the entire history of the American theater, has so much of the truth of Black people's lives been seen on the stage," observed James Baldwin shortly before *A Raisin in the Sun* opened on Broadway in 1959. This edition presents the fully restored, uncut version of Hansberry's landmark work with an introduction by Robert Nemiroff. Lorraine Hansberry's award-winning drama about the hopes and aspirations of a struggling, working-class family living on the South Side of Chicago connected profoundly with the psyche of Black America—and changed American theater forever. The play's title comes from a line in Langston Hughes's poem "Harlem," which warns that a dream deferred might "dry up/like a raisin in the sun." "The events of every passing year add resonance to *A Raisin in the*

Sun," said The New York Times. "It is as if history is conspiring to make the play a classic." While much attention has been devoted to performances of Shakespeare's plays today, little has been focused on modern productions of the plays of his contemporaries, such as Marlowe, Webster and Jonson. *Performing Early Modern Drama Today* offers an overview of early modern performance, featuring chapters by academics, teachers and practitioners, incorporating a variety of approaches. The book examines modern performances in both Britain and America and includes interviews with influential directors, close analysis of particular stage and screen adaptations and detailed appendices of professional and amateur productions. Chapters examine intellectual and practical opportunities to analyse what is at stake when the plays of Shakespeare's contemporaries are performed by ours. Whether experimenting with original performance practices or contemporary theatrical and cinematic ones, productions of early modern drama offer an inspiring, sometimes unusual, always interesting perspective on the plays they interpret for modern audiences. (Applause Books). This book features 67 articles from experts all over the world on the theme of coaching actors for performances in film, broadcast and e-media. Covers a wide variety of topics, from Breathing Principles & Pedagogy to Dialect/Accent Studies to Private Studio Practice.
