[James Baldwin](#) Oct 22 2019 Available in book form for the first time, the FBI's secret dossier on the legendary and controversial writer. Decades before Black Lives Matter returned James Baldwin to prominence, J. Edgar Hoover's FBI considered the Harlem-born author the most powerful broker between black art and black power. Baldwin's 1,884-page FBI file, covering the period from 1958 to 1974, was the largest compiled on any African American artist of the Civil Rights era. This collection of once-secret documents, never before published in book form, captures the FBI's anxious tracking of Baldwin's writings, phone conversations, and sexual habits—and Baldwin's defiant efforts to spy back at Hoover and his G-men. James Baldwin: The FBI File reproduces over one hundred original FBI records, selected by the noted literary historian whose award-winning book, *F.B. Eyes: How J. Edgar Hoover's Ghostreaders Framed African American Literature*, brought renewed attention to bureau surveillance. William J. Maxwell also provides an introduction exploring Baldwin's enduring relevance in the time of Black Lives Matter along with running commentaries that orient the reader and offer historical context, making this book a revealing look at a crucial slice of the American past—and present.

[Prehistoric Sandals from Northeastern Arizona](#) Feb 24 2020 During the late 1920s and early 1930s, archaeologists Earl and Ann Axtell Morris discovered an abundance of sandals from the Basketmaker II and III through Pueblo III periods while excavating rockshelters in northeastern Arizona. These densely twined sandals made of yucca yarn were intricately crafted and elaborately decorated, and Earl Morris spent the next 25 years overseeing their analysis, description, and illustration. This is the first full published report on this unusual find, which remains one of the largest collections of sandals in Southwestern archaeology. This monograph offers an integrated archaeological and technical study of the footwear, providing for the first time a full-scale analysis of the complicated weave structures they represent. Following an account by anthropologist Elizabeth Ann Morris of her parents' research, textile authority Ann Cordy Deegan gives an overview of prehistoric Puebloan sandal types and of twined sandal construction techniques, revealing the subtleties distinguishing Basketmaker sandals of different time periods. Anthropologist Kelley Ann Hays-Gilpin then discusses the decoration of twined sandals and speculates on the purpose of such embellishment.

[The Baldwin Locomotive Works, 1831-1915](#) Mar 02 2023 Winner of the Hilton Book Award from the Railway and Locomotive Historical Society The largest maker of heavy machinery in Gilded Age America and an important global exporter, the Baldwin Locomotive Works of Philadelphia achieved renown as one of the nation's most successful and important firms. Relying on gifted designers and skilled craftsmen, Baldwin built thousands of standard and custom steam locomotives, ranging from narrow gauge 0-4-0 industrial engines to hugeallet compounds. John K. Brown analyzes the structure of railroad demand; the forces driving continual innovation in locomotive design; Baldwin's management systems, shop-floor skills, and career paths; and the evolution of production methods.

Mastering Tableau Oct 26 2022 Master the intricacies of Tableau to create effective data visualizations About This Book Arm yourself with an arsenal of advanced chart types and geocoding to efficiently and engagingly present information Map a grid over a network node diagram and use that grid to demonstrate loads, processing time, and more in Tableau Integrate R with Tableau by utilizing R functions, libraries, and saved models Who This Book Is For If you are a business analyst without developer-level programming skills, then this book is for you. You are expected to have at least a fundamental understanding of Tableau and basic knowledge of joins, however SQL knowledge is not assumed. You should have basic computer skills, including at least moderate Excel proficiency. What You Will Learn Create a worksheet that can display the current balance for any given period in time Recreate a star schema from in a data warehouse in Tableau Combine level of detail calculations with table calculations, sets, and parameters Create custom polygons to build filled maps for area codes in the USA Visualize data using a set of analytical and advanced charting techniques Know when to use Tableau instead of PowerPoint Build a dashboard and export it to PowerPoint In Detail Tableau has emerged as one of the most popular Business Intelligence solutions in recent times, thanks to its powerful and interactive data visualization capabilities. This book will empower you to become a master in Tableau by exploiting the many new features introduced in Tableau 10.0. You will embark on this exciting

journey by getting to know the valuable methods of utilizing advanced calculations to solve complex problems. These techniques include creative use of different types of calculations such as row-level, aggregate-level, and more. You will discover how almost any data visualization challenge can be met in Tableau by getting a proper understanding of the tool's inner workings and creatively exploring possibilities. You'll be armed with an arsenal of advanced chart types and techniques to enable you to efficiently and engagingly present information to a variety of audiences through the use of clear, efficient, and engaging dashboards. Explanations and examples of efficient and inefficient visualization techniques, well-designed and poorly designed dashboards, and compromise options when Tableau consumers will not embrace data visualization will build on your understanding of Tableau and how to use it efficiently. By the end of the book, you will be equipped with all the information you need to create effective dashboards and data visualization solutions using Tableau. Style and approach This book takes a direct approach, to systematically evolve to more involved functionalities such as advanced calculation, parameters & sets, data blending and R integration. This book will help you gain skill in building visualizations previously beyond your capacity.

Laser Interaction and Related Plasma Phenomena Aug 24 2022 Since the third Workshop on "Laser Interaction and Related Plasma Phenomena" in 1973, one area within the scope of this conference received increased attention: laser fusion. This possibility was emphasized in February 1977 in a Seminar on US energy policies at The Hartford Graduate Center by John F. O'Leary, Head of the Federal Energy Administration, who said that "by the year 2100, ... laser fusion will be coming along, giving us a new age of choice". Efforts in research and development were stepped up to investigate new concepts of laser ignition of controlled nuclear reactions. Here, one expects no radioactive waste from fuel. The deuterium-tritium reaction - the only one which may be possible with magnetic field confinement in tokamaks - has a highly radioactive tritium cycle, while, in principle, laser reactions are possible with pure deuterium, hydrogen-boron or others. The worldwide progress in laser compression was not only stimulated by the energy crisis, but also by its advancements. In our first Workshop in 1969 F. Floux of the French Limeil Laboratories described his experiments, which led, only one month later, to the production of fusion neutrons in such large numbers as had not been achieved up to then (see appendix of Vol. I these Proceedings).

Fact Sheet Dec 16 2021

James Baldwin Dec 28 2022 "This fine collection of essays represents an important contribution to the rediscovery of Baldwin's stature as essayist, novelist, black prophetic political voice, and witness to the Civil Rights era. The title provides an excellent thematic focus. He understood both the necessity, and the impossibility, of being a black 'American' writer. He took these issues 'Beyond'---Paris, Istanbul, various parts of Africa---but this formative experience only returned him to the unresolved dilemmas. He was a fine novelist and a major prophetic political voice. He produced some of the most important essays of the twentieth century and addressed in depth the complexities of the black political movement. His relative invisibility almost lost us one of the most significant voices of his generation. This welcome 'revival' retrieves it. Close call." ---Stuart Hall, Professor Emeritus, Open University This interdisciplinary collection by leading writers in their fields brings together a discussion of the many facets of James Baldwin, both as a writer and as the prophetic conscience of a nation. The core of the volume addresses the shifting, complex relations between Baldwin as an American—"as American as any Texas GI" as he once wryly put it—and his life as an itinerant cosmopolitan. His ambivalent imaginings of America were always mediated by his conception of a world "beyond" America: a world he knew both from his travels and from his voracious reading. He was a man whose instincts were, at every turn, nurtured by America; but who at the same time developed a ferocious critique of American exceptionalism. In seeking to understand how, as an American, he could learn to live with difference—breaking the power of fundamentalisms of all stripes—he opened an urgent, timely debate that is still ours. His America was an idea fired by desire and grief in equal measure. As the authors assembled here argue, to read him now allows us to imagine new possibilities for the future. With contributions by Kevin Birmingham, Douglas Field, Kevin Gaines, Briallen Hopper, Quentin Miller, Vaughn Rasberry, Robert Reid-Pharr, George Shulman, Hortense Spillers, Colm Tóibín, Eleanor W. Traylor, Cheryl A. Wall, and Magdalena Zaborowska.
