Handbook on Flaps in Crush Injuries of the Hand is a concise and practical guide to various procedures in reconstructive hand surgery. This book consists of 12 chapters covering specific aspects of hand surgery. The introduction explains common terms such as degloving (an injury which removes the skin), avulsion (injuries involving the detachment of a body structure), crush injury and flaps (movement of tissue with an intact blood supply from a donor site to recipient site). Other chapters cover various techniques in detail including fasciotomy, skin grafts and various types of flaps. Further chapters discuss a number of clinical cases, amputations, splints and fixtures, and a range of microvascular techniques. This book features the latest advances in reconstructive hand surgery, including tissue transplantation from the fingers, hand and forearm, and new flap procedures. Techniques for the management of fingertip injuries are also discussed in

detail. Illustrated throughout in full colour and enhanced by detailed clinical cases, Handbook on Flaps and Crush Injuries of the Hand is an essential and up-to-date guide for orthopaedic residents, fellows, postgraduates and junior doctors. Key Points Guide to various procedures in reconstructive hand surgery Includes the latest advances and procedures Various clinical cases enhanced by 220 full colour images and illustrations With a large number of clinical photographs, Making Decisions and Avoiding Complications in Skin Flaps is an atlas intended for the surgeon who already has a grasp of the fundamentals and mechanics of flap repair, but may need additional ideas on selecting an appropriate flap for a given defect. Divided into three sections, the book begins with a section on repairs organized by location on the body. Rather than an exhaustive list of all flaps ever used, the book focuses on the ones the authors have successfully used on a routine basis. The second

section contains repairs organized by flap type and the third section contains clinical photographs of suboptimal results with a discussion of what may have gone wrong and what could have been done differently to obtain a better result. The intent of this text is not to showcase results but to present flap options for different defects and anatomic sites. Each example includes a photograph showing the defect and a second showing the repair. When available and/or of educational value, illustrations of the flap or long-term follow-up photos are supplied. Throughout the text, surgical pearls are presented in bold text which can help optimize a particular flap's success rate and/or aesthetic outcome. These pearls have also been compiled into an addendum at the end of the book. Have fun playing hide and seek with Llama Llama in this sturdy board book featuring flaps and a mirror for only \$12.99. Grow your heart three sizes and get in on all of the Grinch-mas cheer with this lift-the-flap board book edition of the holiday classic for the youngest Seuss fans! A board-book version of Dr. Seuss's

How the Grinch Stole Christmas! This super-simple, super-sturdy adaptation of the beloved holiday classic is perfect for the youngest Seuss fans. With a shortened rhymed text and over sixty Grinchy flaps for little fingers to lift, it's an ideal introduction to the story and a perfect gift for toddlers and preschoolers. Now everyone in the family can have a merry Grinchmas! This book provides a practical, step-by-step guidance on modern workhorse flaps for plastic and reconstructive surgeons in training or in their early career. The 50 chapters cover everything from surgical fundamentals to preconditions of microsurgical techniques, but also covers pre-operative planning, steps of microsurgical dissection and management of complications in a straightforward, explanatory style, and are supplemented by over 600 clinical illustrations and cadaveric images. Further videos demonstrations with pertinent steps in flap dissection, anatomical

nomenclature and long-term outcomes are also demonstrated. For each flap a detailed discussion of key papers concerning its origin, pitfalls, technical refinements and tips for success are also included. Thanks to specific notes on common reconstructive challenges and complications, this book offers a valuable reference tool and would be unquestionably an integral reference guide for every surgeon interested in reconstructive microsurgical techniques, especially during their early microsurgical career. Readers lift flaps to explore the life of people in Playtown. Flaps to lift on every page reveal what goes on inside a computer, how coding works and how computers talk to each other across the internet. The principles of coding, from simple commands to algorithms, are explained with a treasure hunt game and puzzles, and there are examples of programs in the coding language Scratch(tm). Includes internet links to specially selected websites

where children can discover more coding ideas, tips and games. Computer coding is now a compulsory topic on the UK National Curriculum for primary schools, and children learn to create and debug simple programs at Key Stage 1. This addition to the well-known Katz's board book series celebrates the love and time shared between a special Grandma and her grandchildren. Everyone is excited when Grandma comes for a visit! Following *Where is Baby's Mommy?*, this new lift-the-flap book from Karen Katz is a special tribute to grandmothers and the bond they share with their grandchildren. Through bold illustrations, simple text, and numerous lift-the-flaps, discover all of the surprises Grandma brought with her in this endearing and charming story that is certain to have your child calling for Grandma. *Local and Regional Flaps in Head & Neck Reconstruction: A Practical Approach* provides comprehensive, step-by-step instruction for flap raising and

insetting for the head and neck region. Ideal for oral and maxillofacial surgeons, facial plastic surgeons, and head and neck surgeons, the book serves as a useful guide to planning reconstructive cases and an easily accessible reference prior to operation. *Local and Regional Flaps in Head & Neck Reconstruction* is logically organized into 24 chapters, each focusing on a local or regional flap, or a special site reconstruction. Chapters focused on a particular flap will begin with a detailed description of the relevant anatomy and discuss potential applications of the flap before moving into a detailed step-by-step description of how to elevate and transfer the flap to the defect site. Potential complications will also be addressed. Well-illustrated with more than 800 clinical photographs and with a website featuring surgical procedures, this book is an ideal reference for those new to practice and experts alike. When a strange egg appears in their nest, Mr. and Mrs. Bird

kindly take it upon themselves to raise the "baby bird" inside. But when the egg hatches, the Birds are in for a big surprise-- "Junior" is the oddest-looking baby bird they've ever seen-- with big, long jaws full of teeth and an appetite to match. In fact, he looks more like a baby alligator than a baby bird! Nevertheless, the devoted Birds run themselves ragged feeding Junior until he gets so big, he must leave the nest or it will collapse underneath him. But how can Junior fly without wings? To the delight of the Birds--and readers!--the dilemma is solved when Junior takes off from a branch overlooking a pond. Discover a revolutionary approach to reconstructive surgery! Now in its Second Edition, *The Atlas of Regional and Free Flaps for Head and Neck Reconstruction* delivers clear, heavily illustrated coverage of regional skin, muscle, and musculocutaneous flaps as well as donor sites from distant regions of the body where vascularized skin, muscle, bone, and nerves can be

harvested and transferred to the head and neck. The Atlas will prove invaluable information to otolaryngologists, plastic surgeons, and general surgeons, who use both regional and free flaps to reconstruct damage to the head and neck caused by cancer and trauma. This Atlas provides the surgeon with techniques for mastering different donor sites needed to find solutions to virtually every reconstruction problem. It provides detailed descriptions of the anatomy and harvesting techniques of the major regional and free-flap donor sites currently employed in head and neck reconstruction. The in-depth coverage that readers trust... \* Clinically detailed full-color line drawings emphasize proper harvesting technique for all flaps. \* Full procedural discussions address relevant anatomy, flap design and utilization, anatomic variations, preoperative and postoperative care, tips for avoiding potential pitfalls, and harvesting techniques for each

donor site. \* Use of fresh cadaver dissections provides the most realistic portrayal of step-by-step detail that gives the resident and attending surgeon a thorough understanding of each donor site. Plus a wealth of features NEW to the Second Edition... \* New chapters address the submental flap, ulnar forearm flap, anterolateral thigh flap, paramedian forehead flap, cervicofacial advancement flap, and perforator flaps. \* New content on skin-flap harvesting includes: addition of the coronoid harvest process to the temporalis chapter; addition of the osteocutaneous radial forearm flap to the radial forearm flap chapter; addition of scalp harvest to the chapter on the temporoparietal fascial flap; addition of scapular tip harvest for use in palatomaxillary reconstruction; and addition of harvest of the IMA and IMV recipient vessels and harvest of the TAC system of vessels to the recipient vessel chapter. \* New demonstrations of flap inseting and design for a

number of reconstructions The aims of this Atlas are to introduce the clinical applications of perforator flaps in plastic surgery and skin replacement. After a brief introduction of the concept and surgical rationale of perforator flaps, the book presents 24 different flaps from donor sites including upper limb, lower limb and the trunk. It shows the surgical dissection techniques of each flap step by step, from vascular anatomy, flap design and elevation to harvest and transfer. The book is composed of operative pictures, drawings and concise interpretation. Written by a group of micro surgeons and hand surgeons working in the fields of orthopedic, trauma, hand, plastic and reconstructive surgery, this Atlas offers a valuable reference work for medical researchers and doctors in microsurgery, orthopedic surgery and plastic and reconstructive surgery. Readers can lift the flap to find indicated colors, animals, and actions as children garden and

play outside in the spring. On board pages. Readers can lift the flaps to find more of Blue's clues as Joe, Periwinkle, and Green Puppy try to figure out what Blue's favorite season is. Introduces young readers to a wide variety of animals and where they live while teaching basic concepts including colors, opposites, and counting. Observe the quirks of the non-autistic Johnny through the eyes of someone with Autism Spectrum Disorder (ASD). Turning the tables on common perceptions of 'normal' social behaviour, our narrator lets us know that Johnny is 'different', but that's OK. Understanding the concept of time in relation to routine activities is a vital pre-school skill, and this interactive book is an engaging introduction to daily routines, ordering events and describing your day. A fun introduction to a key early learning concept, with over 60 flaps to lift. Part of a growing series of lift-the-flap first concept books which introduce young children to colours, counting, first words and more. An ideal book for

parents and children to share with plenty for pre-readers to explore and talk about.
