Women in the Chemical Workforce Sep 30 2020 For a period of history no women worked outside the home. Bust as years have gone by and society has changed, Women are working varying jobs every day. They are, however, underrepresented in some sectors of jobs. This includes women in the engineering and science fields. To matters worse, women do not ascend the career ladder as fast as or as far as men do. The impact of this and related problems for science, the academic enterprise, the U.S. economy, and global economic competitiveness have been recently examined. The Chemical Sciences Roundtable evaluate that the demographics of the workforce and the implications for science and society vary, depending on the field of science or engineering. The roundtable has organized a workshop, "Women in the Chemical Workforce," to address issues pertinent to the chemical and chemical engineering workforce as a whole, with an emphasis on the advancement of women. Women in the Chemical Workforce: A Workshop Report to the Chemical Sciences Roundtable includes reports regarding the workshop's three sessionsâ€"Context and Overview, Opportunities for Change, and Conditions for Successâ€"as well as presentations by invited speakers, discussions within breakout groups, oral reports from each group.

A Summary of Results of Louisiana White Shrimp Tagging Experiments, 1977 May 19 2022 "The shrimp fishery in the Gulf and Atlantic coastal states is considered to be the most valuable fishery in the United States. The Gulf of Mexico has been the major production area for shrimp in the United States, accounting for approximately 80% of the total value of shrimp landed in this country. The directed shrimp fishery in the Gulf of Mexico harvests brown shrimp (*Penaeus aztecus*), white shrimp (*P. setiferus*), and pink shrimp (*P. duorarum*). Of these species, brown shrimp account for approximately 53% of total production, while white and pink shrimp account for 26% and 15%, respectively. The state of Louisiana is the center of white shrimp production. In 1977, there were over 14 million kilograms (31.3 million pounds) of white shrimp (heads-off weight) landed at commercial businesses in Louisiana (USDOC, 1979). In 1977, NMFS contracted with the Louisiana Department of Wildlife and Fisheries to tag and release white shrimp in the Caillou Lake estuary system, in response to management priorities identified in the regional shrimp fishery management plan for the Gulf of Mexico (Christmas and Etzold, 1977). These priorities included the determination of estimates regarding growth rates, mortality rates, and migration patterns characterizing major penaeid stocks in the Gulf of Mexico. This report presents a summary of these mark-recapture experiments"--Introduction.

Globalisation and Work in Asia Sep 23 2022 This book reviews employment conditions in Asian countries. This is the hub of the strongest growth area in the world economy and while attention has focussed on job growth and industrial transformation, there has been very little attention on employment characteristics

and employment conditions. In particular, the book addresses the issue of whether globalisation, taken to mean the growing international integration of economies, is a factor that leads to a convergence of employment conditions, and more importantly, an improvement in employment conditions. The book brings together contributions on many Asian economies where these core questions are considered at both the macro level and for specified industries. Addresses fundamental questions regarding growth, globalisation and working conditions Includes analysis of West, East and North Asian countries Includes an overview chapter from researchers from the ILO

Polymer Photogravure Aug 22 2022 Polymer Photogravure: A Step-by-Step Manual Highlighting Artists and Their Creative Practice is a three-part book on the non-toxic process of making ink-on-paper intaglio prints from continuous-tone photographs using water-etched photopolymer plates. Author Clay Harmon provides clear and easy to understand instructions that will enable anyone to successfully make a photogravure print. By quantifying the sensitometric behavior of polymer plates, Harmon has developed a methodical approach which will enable a new printmaker to produce plates in their own studio with a minimum of time and wasted materials. Section One provides a straightforward guide to setting up the polymer photogravure studio. Section Two covers a step-by-step method of making the print from start to finish. Section Three showcases contemporary artists' works, illustrating the variety and artistic breadth of contemporary polymer intaglio printmaking. The works in these pages range from monochrome to full color, and represent a variety of genres, including still lifes, portraits, nudes, landscapes, urban-scapes and more. Featuring over 30 artists and 200 full-color images, Polymer Photogravure is a most comprehensive overview of this printmaking process in print. Key topics covered include: Studio safety Equipment and supplies, evaluated from both a cost and utility point of view A brief discussion of the types of ink-based printing Aquatint screen considerations Image preparation and positive printing on inkjet printers Paper preparation A simple and efficient polymer plate calibration process that minimizes wasted time and materials A straightforward inking, wiping and printing method Advanced printing techniques such as chine collé, à la poupée, and printing on wood Troubleshooting guide to platemaking and printing problems Tips on editioning and portfolios A visual survey of the range of artistic expression practiced by contemporary artists Sources for supplies and recommended reading Polymer photogravure plates enable an artist to use an almost-infinite range of image color and papers to make a print. The finished prints are extremely archival, consisting of only ink and paper. With Harmon's instructions, continuous tone intaglio prints are within the reach of all.

Urban Climates Jan 03 2021 The first full synthesis of modern scientific and applied research on urban climates, suitable for students and researchers alike.

The Printers' Manual Nov 20 2019 This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work was reproduced from the original artifact, and remains as true to the original work as possible. Therefore, you will see the original copyright references, library stamps (as most of these works have been housed in our most important libraries around the world), and other notations in the work. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. As a reproduction of a historical artifact, this work may contain missing or blurred pages, poor pictures, errant marks, etc. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

Workforce Cross Training Dec 14 2021 In today's ultra-competitive global business environment, it is

becoming increasingly important for companies to reduce spending while simultaneously improving their efficiency and productivity. To achieve this goal, many organizations are opting to implement cross training programs in order to maximize the potential of their existing workforce, thus avoiding the need to outsource. Filling a gap in the literature, Workforce Cross Training presents a pioneering overview of the currently available research on this topic and provides invaluable insight into the design of successful cross training programs. Featuring contributions from a team of experts, this text integrates information from a wide variety of disciplines including human factors, industrial engineering, operations management, and behavioral psychology. The authors examine the use of cross training programs in various work environments including serial production systems, call centers, and manufacturing industries. Discussion includes best practices of cross training methods and the future opportunities offered by cross training programs. A single resource featuring an in-depth summary of the policies, methods, and results of cross training, this book delivers a much needed source of guidance for creating effective workforce cross training programs.

Green Careers in Energy: State and Federal Workforce Training Nov 01 2020 Looking for information on green career help provided by state and federal workforce training centers? As part of Peterson's Green Careers in Energy, this eBook offers information for the One-Stop Centers for all fifty U.S. states and the District of Columbia, plus a general description of each individual program and workforce development information that each center provides-including resources for finding jobs, writing resumes, and developing interview skills. Simply find your state and you'll uncover a wealth of information, including phone numbers and Web addresses.

Advanced Digital Architectures for Model-Driven Adaptive Enterprises Jun 27 2020 The five digital forces (mobility and pervasive computing, cloud, big data, artificial intelligence and robotics, and social media) are poised to bring great academic and industrial breakthroughs. All stakeholders want to understand how to best harness these forces to their advantage. While literature exists for understanding each force independently, there is a lack of knowledge on how to utilize all the forces together to realize future enterprises. Advanced Digital Architectures for Model-Driven Adaptive Enterprises is an essential reference source that explores the potential in unifying the five digital forces to achieve increased levels of agility, efficiency, and scale. Featuring coverage on a wide range of topics including socio-technical systems, adaptive architectures, and enterprise modeling, this book is ideally designed for managers, executives, programmers, designers, computer engineers, entrepreneurs, tool builders, digital practitioners, researchers, academicians, and students at the graduate level.
