Orbital Mechanics for Engineering Students, Second Edition, provides an introduction to the basic concepts of space mechanics. These include vector kinematics in three dimensions; Newton's laws of motion and gravitation; relative motion; the vector-based solution of the classical two-body problem; derivation of Kepler's equations; orbits in three dimensions; preliminary orbit determination; and orbital maneuvers. The book also covers relative motion and the two-impulse rendezvous problem; interplanetary mission design using patched conics; rigid-body dynamics used to characterize the attitude of a space vehicle; satellite attitude dynamics; and the characteristics and design of multi-stage launch vehicles. Each chapter begins with an outline of key concepts and concludes with problems that are based on the material covered. This text is written for undergraduates who are studying orbital mechanics for the first time and have completed courses in physics, dynamics, and mathematics, including differential equations and applied linear algebra. Graduate students, researchers, and experienced practitioners will also find useful review materials in the book. NEW: Reorganized and improved discussions of coordinate systems, new discussion on perturbations and quaternions NEW: Increased coverage of attitude dynamics, including new Matlab algorithms and examples in chapter 10 New examples and homework problems Curate an introductory operations management approach that makes this course accessible and engaging for all business majors. What specific, immediate actions can you take to enhance your well-being and thrive both on and off the job? Award-winning teacher Chase Mielke draws from his own research, lesson plans, and experiences with burnout to help you change your outlook, strengthen your determination to be a terrific teacher, and reignite your core passion for teaching. Often lighthearted, yet thoroughly grounded in research on social-emotional learning and positive psychology, The Burnout Cure explains how shifts in awareness, attitudes, and actions can be transformational for you and for your students. The book describes specific steps related to mindfulness, empathy, gratitude, and altruism that you can use on your own and with students via classroom lessons and activities. Equipped with these tools, teachers can be their best, so they can give their best to the learners in their care. "Sexy firefighter Logan Bailey is an expert at putting the wet stuff on the hot stuff--on and off duty. But he just did the unthinkable, and it wasn't trading in his tube socks. He slept with his nemesis. His mortal enemy. The crazy redhead he loves to hate. Cara Goulding. And no matter how much he wants to lie to himself, he has to admit, it was mind-blowing. Cara will not be tempted by the one night she spent with prince dickhead--even if her traitorous body remembers every earth-shattering moment. It was a mistake and she's stronger than that. She'll

just keep avoiding him and pretend it didn't happen. But the feuding small town of Tilikum might not be big enough for the both of them. Avoiding each other isn't working. And with every moment they're forced to spend together, the sparks get hotter, the flames grow brighter, and the tension borders on unbearable. Until they both reach their breaking point and their fiery relationship explodes"--Page [4] of cover.
