Labour Law and Sustainable Development Sep 20 2021 Labour Law and
Sustainable Development is a detailed reconstruction of the regulatory
framework and jurisprudential findings of sustainable development at the
international, European and national level. The global crisis of the past
decade has underlined the social unsustainability of the ultra-liberalistic
theories through which the labour law deregulation represents the

precondition for social and economic development coherent with the globalization imperatives. It is no exaggeration to assert that the existing foundations of labour law have been irreversibly compromised. It is essential to find a way out of the crisis, at the same time defining the founding values of new sustainable labour law. In linking labour law with the sustainability paradigm, this provocative book promises to widen the scope and terms of the reconciliation of interests, taking into account the multiplicity of the stakeholders interested in economic, social and environmental issues and, in particular, to practise an approach that achieves intergenerational equity. What 's in this book: In an unprecedented comparative study, including case law, of the network of principles, agreements, practices and norms concerning sustainable development and its different economic and social implications, the author examines such facets as the following: sustaining solidarity and equality of opportunity in current and emerging work situations; enhancing individual autonomy in the current world of (subordinate but independent) labour; reconciling personal needs, flexible organization of companies and reduction of external and internal costs to companies; collective action for the regulation of labour relations allowing for the exercise of individual autonomy; involving entire populations that have been so far excluded in the world scene; developing a sustainable pension system to promote intergenerational solidarity; implementing flexicurity policies positively; social clauses of international trade treaties; undoing the profound contradiction of gender and wage inequalities; and promoting corporate social responsibility. The objective of this book is to provide the reader with a reasoning basis to assess whether the choice to elect sustainable development as a new paradigm of reference for labour law is feasible, and if, in particular, this choice can be useful in order to define the founding values of a new ' sustainable ' labour law. How this will help you: Using an interdisciplinary approach, the author emphasizes the need to consider the various dimensions of sustainability together, not only the original environmental but also the economic and social dimensions. This book offers a real strategic leap for both legislators and social actors, in particular leading the way to avoiding a fracture of the generational pact that has held together modern societies. Although the book presents a profound academic contribution to the analysis of labour law realities and trends, it will also be welcomed by corporate lawyers,

judges, human rights experts, trade unionists, business managers, entrepreneurs and consultants interested in the issues of labour, sustainable development and social rights.

Montesquieu: an introduction Mar 07 2023 What can Montesquieu still teach us today? Montesquieu was the first political writer who first formulated the principles of separation of powers and the independence of justice. He was the first to scientifically study human institutions, both ancient and modern, Asiatic and European, African and American. Again, he was the first thinker to theorize Federal Democracy, systematically tracking down the root causes of human events in its environmental, cultural, historical, and geographical aspects. Analysing several aspects of Montesquieu ' s philosophical and political thought, this volume highlights his stoicism, realism, anti-despotism as well as his staunch defence of human dignity. Introducing one of the sharpest thinkers of modernity, this book offers fundamental tools to understand the very ground of our contemporary times.

Vigilantism against Migrants and Minorities (OPEN ACCESS) Dec 24 2021 This edited volume traces the rise of far right vigilante movements – some who have been involved in serious violence against minorities, migrants and other vulnerable groups in society, whereas other vigilantes are intimidating but avoid using violence. Written by an international team of contributors, the book features case studies from Western Europe, Eastern Europe, North America, and Asia. Each chapter is written to a common research template examining the national social and political context, the purpose of the vigilante group, how it is organised and operates, its communications and social media strategy and its relationship to mainstream social actors and institutions, and to similar groups in other countries. The final comparative chapter explores some of the broader research issues such as under which conditions such vigilantism emerges, flourishes or fails, policing approaches, masculinity, the role of social media, responses from the state and civil society, and the evidence of transnational co-operation or inspiration. This is a groundbreaking volume which will be of particular interest to scholars with an interest in the extreme right, social movements, political violence, policing and criminology.

The Routledge Handbook of Translation and Activism Oct 22 2021 The Routledge Handbook of Translation and Activism provides an accessible,

diverse and ground-breaking overview of literary, cultural, and political translation across a range of activist contexts. As the first extended collection to offer perspectives on translation and activism from a global perspective, this handbook includes case studies and histories of oppressed and marginalised people from over twenty different languages. The contributions will make visible the role of translation in promoting and enabling social change, in promoting equality, in fighting discrimination, in supporting human rights, and in challenging autocracy and injustice across the Middle East, Africa, Latin America, East Asia, the US and Europe. With a substantial introduction, thirty-one chapters, and an extensive bibliography, this Handbook is an indispensable resource for all activists, translators, students and researchers of translation and activism within translation and interpreting studies.

Tiziano Mannoni. Attualità e sviluppi di metodi e idee. Volume 2 Nov 03 2022 Volume 2 Sezioni: 4. Architetture e insediamenti 5. Territorio 6. Conoscenza e conservazione 7. Altri temi e problemi Come comitato scientifico e organizzativo, il compito che ci siamo assunti non è stato semplicemente rendere omaggio alla memoria di Tiziano Mannoni, e ricordarne l'opera a dieci anni dalla scomparsa, ma evidenziare cosa, e quanto, dei suoi insegnamenti è presente, e vitale, nelle ricerche che conduciamo. L'opera è rivolta soprattutto a chi non ha avuto l'occasione di conoscere l'uomo e il ricercatore che, a nostro avviso, più di altri si è distinto, in Liguria e non solo, per costruire un'archeologia a tutto tondo. Non diciamo 'globale' perché, come lo stesso Mannoni sosteneva negli ultimi anni, il termine può dare un'idea sbagliata: di chi eccede in ambizione, non riconosce la complessità dei problemi storici, confonde la propria ricerca con il tutto.

Solidarity Across Generations Feb 23 2022 This book addresses the universal and topical question of solidarity across generations from a comparative perspective, with a particular focus on the legal issues concerning retirement pensions, the poverty in the elderly, long-term care, as well as state interventions and family support for those at risk. Drawing on insights from the interface between family law, administrative law and social law, it examines 13 countries on different continents, and also briefly covers a number of additional countries in the introduction. This book is based on the discussions and exchanges at the 20th General Congress of the International Academy of Comparative Law, in Fukuoka,

Japan.

The Liminal Papacy of Pope Francis Jul 31 2022

Cultural, Theoretical, and Innovative Approaches to Contemporary Interior Design Oct 02 2022 Interior design can be considered a discipline that ranks among the worlds of art, design, and architecture and provides the cognitive tools to operate innovatively within the spaces of the contemporary city that require regeneration. Emerging trends in design combine disciplines such as new aesthetic in the world of art, design in all its ramifications, interior design as a response to more than functional needs, and as the demand for qualitative and symbolic values to be added to contemporary environments. Cultural, Theoretical, and Innovative Approaches to Contemporary Interior Design is an essential reference source that approaches contemporary project development through a cultural and theoretical lens and aims to demonstrate that designing spaces, interiors, and the urban habitat are activities that have independent cultural foundations. Featuring research on topics such as contemporary space, mass housing, and flexible design, this book is ideally designed for interior designers, architects, academics, researchers, industry professionals, and students.

The Criminalisation of Irregular Migration in Europe Aug 20 2021 This book explores the criminalisation of irregular migration in Europe. In particular, it investigates the meaning, purpose, and consequences of criminalising unauthorised entry and stay. From a theoretical perspective, the book adds to the debate on the persistence of irregular migration, despite governments' attempts at deterring it, by taking an interdisciplinary approach that draws from international political economy and criminology. Using Italy and France as case studies, and relying on previously unreleased data and interviews, it argues that criminalisation has no effect on migratory flows, and that this is due to factors including the latter's structural determinants and the likely creation of substitution effects. Furthermore, criminalisation is found to lead to adverse consequences, including by contributing to vicious cycles of irregularity and insecurity.

The Future of Work Jan 05 2023 Studies in Employment and Social Policy Volume 56 Digitalization, far from being solely a technological issue, has broad implications in the social, labour, and economic spheres. It leads to dangers as well as to new chances for the workforce, and thus labour law

must develop effective ways to both protect workers and allow them to profit from new technological developments. The most thorough book of its kind, this collection of expert essays provides an abundance of well-thought-out material for understanding the consequences of digitalization for the labour market and industrial relations. Recognizing that only an international perspective can make it possible to face the challenges of the present (and the future), renowned authorities from the International Labour Organization and the International Society for Labour and Social Security Law, as well as outstanding labour law professors, examine in depth such salient issues as the following: transformation of production systems; the spread of artificial intelligence; precariousness and exploitation in the gig economy; lessons learned from COVID-19; employment status of platform workers; new cross-border issues; rights to trade union association and collective bargaining; role of the State in the new digital labour market; and blurred lines between work and private life. Thanks to the international team of contributors, the issues are dealt with from a variety of overlapping perspectives and points of view, combining aspects of labour law, commercial law, corporate governance, and international law. Highlighting the need to adapt, especially through the right to training, work, and professionalism with respect to the new technological landscape, the book draws on legislative, judicial, and theoretical initiatives suggesting ways of responding positively to the requests for protection that arise in the new forms of production. A uniquely valuable tool for study and reflection for policymakers and academics, the book is also sure to be valued by entrepreneurs, managers, consultants, corporate lawyers, judges, human rights experts, and trade unionists who are interested in the issues of labour, industrial relations, and social rights in European and international contexts.

La Legge Rognoni-La Torre tra storia e attualità Apr 03 2020 Il 13 settembre 1982 entrò in vigore la Legge n. 646, nota come Legge Rognoni – La Torre, che introdusse per la prima volta nel Codice penale italiano il reato di “ associazione a delinquere di tipo mafioso ” (art. 416 bis) e la conseguente previsione di misure patrimoniali applicabili all’ accumulazione illecita di capitali. A spiegare perché ancora oggi è fondamentale preservare il provvedimento approvato quarant’anni fa, è questo libro monografico, che inaugura la collana AP-profondimenti

promossa da Avviso pubblico, Enti locali e regioni contro mafie e corruzione, curato da Enzo Ciconte, che apre le riflessioni con una descrizione storica del percorso della legge, il testo contiene anche i contributi di un magistrato, di un dirigente di Polizia e di un Sindaco che, da diversi punti di vista, si sono cimentati con l' applicazione del sistema delle misure di prevenzione e con l' utilizzo per finalità di carattere sociale delle ricchezze sottratte alle mafie. Vi è anche un contributo di Giuliano Turone, magistrato che indagò sulla mafia e sulla P2, riconosciuto come uno dei più autorevoli studiosi del reato associativo di tipo mafioso. Vengono inoltre pubblicati un' intervista inedita a Virginio Rognoni e gli stralci di alcuni documenti storici recentemente desecretati, insieme a dati statistici su beni e aziende confiscate.

Medical Misinformation and Social Harm in Non-Science Based Health Practices Jan 31 2020 Fraudulent, harmful, or at best useless pharmaceutical and therapeutic approaches developed outside science-based medicine have boomed in recent years, especially due to the commercialisation of cyberspace. The latter has played a fundamental role in the rise of false ' health experts ' , and in the creation of filter bubbles and echo chambers that have contributed to the formation of highly polarised debates on non-science-based health practices—online as well as offline. By adopting a multidisciplinary approach, this edited book brings together contributions of international academics and practitioners from criminology, digital sociology, health psychology, medicine, law, physics, and journalism, where they critically analyse different types of non-science-based health approaches. With this volume, we aim to reconcile different scientific understandings of these practices, synthesising a variety of empirical, theoretical and interpretative approaches, and exploring the challenges, implications and potential remedies to the spread of dangerous and misleading health information. This edited book will offer some food for thought not only to students and academics in the social sciences, health psychology and medicine among other disciplines, but also to medical practitioners, science journalists, debunkers, policy makers and the general public, as they might all benefit from a greater awareness and critical knowledge of the harms caused by non-scientific health practices.

Experimental and Independent Italian Cinema Nov 10 2020 Discussing a

variety of independent and experimental Italian films, this book gives voice to a critically neglected form of Italian cinema. By examining the work of directors such as Marinella Pirelli, Mirko Locatelli and Cesare Zavattini, the book defines, inspects and studies the cinematic panorama of Italy through a new lens. It thereby explores the character of independent films and their related practices within the Italian historical, cultural and cinematic landscape.

Generosity and Architecture Jul 19 2021 This book proposes that architecture can function as a true embodiment of generosity and examines how generosity in architecture operates within, and questions, current and historical socio-economic and political systems. As such, it interrogates ways in which architecture aspires for something more, whether within economic austerities or within historic contexts of a discipline that has often been preoccupied with cost and quantitative measurement. The texts presented in this book critically examine the theme of generosity and architecture from a variety of perspectives, addressing the theoretical, the historical, and the everyday processes of architectural practice, procurement, and policy in a global context. The book is a richly collaborative text which explores how architecture – in its processes of ordering and shaping space – can represent and embody generosity in all its multi-faceted potential.

ANNO 2023 LE RELIGIONI PRIMA PARTE Sep 08 2020 Antonio Giangrande, orgoglioso di essere diverso. ODIÒ OSTENTAZIONE, IMPOSIZIONE E MENZOGNA. Si nasce senza volerlo. Si muore senza volerlo. Si vive una vita di prese per il culo. Tu esisti se la tv ti considera. La Tv esiste se tu la guardi. I Fatti son fatti oggettivi naturali e rimangono tali. Le Opinioni sono atti soggettivi cangianti. Le opinioni se sono oggetto di discussione ed approfondimento, diventano testimonianze. Ergo: Fatti. Con me le Opinioni cangianti e contrapposte diventano fatti. Con me la Cronaca diventa Storia. Noi siamo quello che altri hanno voluto che diventassimo. Facciamo in modo che diventiamo quello che noi avremmo (rafforzativo di saremmo) voluto diventare. Rappresentare con verità storica, anche scomoda ai potenti di turno, la realtà contemporanea, rapportandola al passato e proiettandola al futuro. Per non reiterare vecchi errori. Perché la massa dimentica o non conosce. Denuncio i difetti e caldeggio i pregi italiani. Perché non abbiamo orgoglio e dignità per migliorarci e perché non sappiamo apprezzare, tutelare e promuovere quello che abbiamo

ereditato dai nostri avi. Insomma, siamo bravi a farci del male e qualcuno deve pur essere diverso!

Valete Vos Viatores Mar 15 2021 Inscriptions were one of the trademarks of Romanization. Used as a real mass media, they covered almost all facets of Roman public and private life. Following common patterns, however, this habit of engraving inscriptions, the so-called “ epigraphic habit ” , took shape in different manifestations in each region, in each province, configuring diverse and attractive epigraphic cultures. This volume, the result of a Creative Europe project coordinated by the University of Navarra and with the participation of the University of Coimbra, the one at Bordeaux and La Sapienza in Roma and, also, of the Museo Nazionale Romano and different research centers in Portugal, France, Spain and Italy, reviews not only the functions of some of these inscriptions with new approaches to well-known repertoires but also the new tools that -from the rise of the Internet to the use of digital photogrammetry, from digital epigraphy to 3d epigraphy- are being implemented for their study, their understanding and, above all, the social dissemination of their values, builders, in large part, of European identity.

Algebraic Geometry between Tradition and Future May 29 2022 An incredible season for algebraic geometry flourished in Italy between 1860, when Luigi Cremona was assigned the chair of Geometria Superiore in Bologna, and 1959, when Francesco Severi published the last volume of the treatise on algebraic systems over a surface and an algebraic variety. This century-long season has had a prominent influence on the evolution of complex algebraic geometry - both at the national and international levels - and still inspires modern research in the area. "Algebraic geometry in Italy between tradition and future" is a collection of contributions aiming at presenting some of these powerful ideas and their connection to contemporary and, if possible, future developments, such as Cremonian transformations, birational classification of high-dimensional varieties starting from Gino Fano, the life and works of Guido Castelnuovo, Francesco Severi's mathematical library, etc. The presentation is enriched by the viewpoint of various researchers of the history of mathematics, who describe the cultural milieu and tell about the bios of some of the most famous mathematicians of those times.

The Social City May 05 2020 In the post-war period, Berlin and Naples experienced a phase of profound changes, essentially influenced by

external factors: the less rigid urban structure which had been ruined by World War II, resulting in severe changes in the social and economic structure, an uncritical reception and implementation of largely theoretical models of functionalism in urban planning, and in the design of the new public building interventions. On the one hand, between the 1940s and the 1980s, Berlin experienced a considerable loss in population, a political isolation and an urban splitting, as the urban planning institutions, deeply influenced by relevant politics, slowly and thoroughly changed the cityscape. On the other hand, Naples suffered from a new phase of immigration as well as from the parallel densification of the old suburbs and the physical expansion of the city limits without consistent and socially appropriate urban planning measures. This phase of change, so full of contrasts, coincided with the establishment of new democratic systems in the Federal Republic of Germany and Italy, and with the fundamental goal of socially adequate housing in both the West and the East. The research involved a series of historical analyses of the relationship between urban development and social housing for critical reflection and to allow an informed evaluation of the contemporary condition. In particular, it investigated housing settlements realised in Berlin and Naples in the first four decades of the post-war period, which corresponds to the period in which public housing was central in both political and urban planning terms. The book focuses on places of living, the city and the house. Consequently, it investigates the scale of the project and that of the intervention, the relationship between innovation and the cultural reception of urban phenomena and, again, between the stage of the project and the realisation and upkeep of the interventions, between democratic expectations and the adequacy of the administration system. These steps have a direct effect on the social identity that inspires, structures and transforms the planned and then built city, that continuous dialogue between form and content (the past) that occurs, in general, through progressive and mutual adaptations. In the selection of the case studies, we have favoured interventions on the “ periphery, ” which are those in which theoretical and aesthetic trends have best manifested themselves and in which planning and design cultures could develop most widely. However, the periphery does not necessarily coincide with the geographical edges of the cities: both in Berlin and in Naples, historical events, or the particular topography have naturally shifted the

“ peripheral ” location along a radius that only ideally starts from the city centre and often extends to its inner fringes. Rather, from a sociological point of view, the same interventions generally generate the peripheral condition, that is, marginalisation or social division. This, as we shall see, can be traced both on the large scale of the city and inside the neighbourhood. The materials are arranged in the following way: the text is introduced by a graphic and synthetic presentation of the historical context in Berlin and Naples and the documentation of the twelve case studies. In the second chapter, Comparison, which was mostly developed as the first by the young scholars involved in the project, three theoretical issues highlighted during the seminars are better presented: The ability of the project to involve the social level; the experimentalism of the interventions, in particular in construction technology, social approach and democratic participation; the relationship between public and private in the phases of implementation and the upkeep of the programmes. The third chapter, In-Depth Analysis, includes the contributions of the scientists involved to give a better articulated historical and critical analysis of many of selected case studies and of the wider urban and social context. The closing editorial paper offers a brief overview focusing on a selection of the theoretical nodes that emerged from the comparison of the materials from a contemporary perspective. The publication is the outcome of the homonymous research programme fully funded by DAAD German Academic Exchange Service and runned in 2019 in cooperation between the Technische Universität of Berlin, Department of Architecture (Habitat Unit) with the Università della Campania "Luigi Vanvitelli," Dipartimento di Architettura e Disegno Industriale in Aversa (Italy). In der Nachkriegszeit erlebten Berlin und Neapel eine Phase tiefgehender Veränderungen, die im Wesentlichen von externen Faktoren beeinflusst wurde: der aufgelockerten, infolge des Zweiten Weltkriegs ruinierten Stadtform, der starken Veränderung der sozialen und wirtschaftlichen Struktur, der unkritischen Rezeption und Implementierung von stark theoretisch geprägten Modellen des Funktionalismus in der Stadtplanung sowie in der Gestaltung der neuen öffentlichen Bauinterventionen. Auf der einen Seite erlebt Berlin zwischen den 40er und den 80er Jahren einen starken Bevölkerungsverlust, eine politische Isolierung und eine urbane Aufspaltung, indem eine stark politisch beeinflusste Stadtplanung das Stadtbild tief verändert. Auf der anderen Seite leidet Neapel unter einer

neuen Einwanderungsphase sowie der parallelen Verdichtung der alten Vorstädte und der physischen Erweiterung der Stadtgrenze, ohne dass konsequente und sozial gemäße stadtplanerische Maßnahmen vorgenommen wurden. Diese kontrastreiche Umbruchsphase stimmt überein mit der Etablierung der neuen demokratischen Regierungssysteme in der Bundesrepublik Deutschland wie auch in Italien und damit mit dem für beide - und im Westen wie im Osten - grundlegenden Ziel des sozial gerechten Wohnens. Das Forschungsvorhaben beinhaltet eine Reihe von historischen Analysen der Beziehung zwischen Stadtentwicklung und sozialem Wohnungsbau zum Zweck der kritischen Reflexion und um eine fundierte Bewertung der jeweiligen zeitgenössischen Bedingungen zu ermöglichen. Insbesondere wurden Wohnsiedlungen untersucht, die in Berlin wie in Neapel in den ersten vier Jahrzehnten nach dem Zweiten Weltkrieg errichtet wurden, d.h. in eben dem Zeitraum, in dem öffentlicher Wohnungsbau sowohl unter politischen wie auch unter stadtplanerischen Aspekten zentral war. Das Buch konzentriert sich auf Lebensräume, die Stadt und das Haus. Folglich untersucht es das Ausmaß des Projekts wie das der Intervention, die Beziehung zwischen Innovation und kultureller Rezeption städtischer Phänomene wie auch zwischen dem jeweiligen Stadium des Projekts und der Umsetzung und Aufrechterhaltung der Interventionen und schließlich zwischen den demokratischen Erwartungen und der Leistungsfähigkeit des Verwaltungssystems. Diese Schritte haben direkte Auswirkungen auf die soziale Identität, welche die zunächst geplante und dann gebaute Stadt inspiriert, strukturiert und transformiert, d.h. diesen ständigen Dialog zwischen Form und Inhalt (die Vergangenheit), der im Allgemeinen durch fortschreitende und gegenseitige Anpassungen abläuft. Bei der Auswahl der Fallstudien haben wir Interventionen in der "Peripherie" bevorzugt, da sie es sind, in denen sich theoretische und ästhetische Trends am deutlichsten abzeichnen und in denen sich Kulturen der Planung und des Designs am weitesten entwickeln könnten. Die Peripherie fällt jedoch nicht unbedingt zusammen mit den geografischen Rändern der Städte: sowohl in Berlin wie in Neapel haben historische Ereignisse oder auch die jeweilige Topografie naturgemäß die "periphere" Lage entlang einem Radius verschoben, der nur im Idealfall vom Stadtzentrum ausgeht und sich oft bis an seine Ränder erstreckt. Von einer soziologischen Perspektive aus ist es eher so, dass im Allgemeinen

die gleichen Interventionen zu einer peripheren Situation führen. d.h. zu Marginalisierung oder sozialer Aufspaltung. Wie wir sehen werden, gilt dies sowohl im größeren Rahmen für die Stadt wie auch innerhalb eines Stadtviertels. Die Materialien sind folgendermaßen angeordnet: Der Text wird eingeführt durch eine grafische und zusammenfassende Präsentation der historischen Zusammenhänge in Berlin und Neapel und eine Dokumentation zu den zwölf Fallstudien. Im zweiten Kapitel – "Vergleich/Comparison" –, das ursprünglich als erstes Kapitel von den jüngeren Forschern, die am Projekt teilnahmen, entwickelt wurde, werden drei Fragen, die während der Seminare im Mittelpunkt standen, genauer vorgestellt: die Eignung des Projekts dafür, die soziale Ebene mit einzubeziehen; der experimentelle Charakter der Interventionen, insbesondere in der Bautechnologie, im sozialen Ansatz und in der demokratischen Teilhabe; die Beziehung zwischen öffentlichem und privatem Engagement in der Phase der Umsetzung wie der Aufrechterhaltung der Programme. Das dritte Kapitel – "Eingehende Analyse/In-Depth-Analyses" – besteht aus den Beiträgen der beteiligten Wissenschaftler, um so eine klarere historische und kritische Analyse von etlichen der ausgewählten Fallstudien und der weiterreichenden städtischen und sozialen Zusammenhänge zu gewährleisten. Der abschließende Kommentarteil bietet einen kurzen Überblick, der den Schwerpunkt auf eine Auswahl von theoretischen Verknüpfungen legt, die sich aus dem Vergleich der Materialien aus zeitgenössischer Perspektive ergeben. Die Veröffentlichung ist das Ergebnis des gleichnamigen Forschungsprogramms, das vollständig vom DAAD (Deutscher Akademischer Austauschdienst) finanziert wurde und 2019 in einer Zusammenarbeit der Architektur-Fakultät (Habitat Unit) der Technischen Universität Berlin mit dem Dipartimento di Architettura e Disegno Industriale der Università della Campania "Luigi Vanvitelli" in Aversa (Italien) durchgeführt wurde. Nel secondo dopoguerra Berlino e Napoli vivono una fase di profondo cambiamento che è condizionato in maniera preponderante da fattori esterni: la parziale disgregazione della forma urbana causata dai bombardamenti bellici, il cambiamento della struttura socio-economica, il recepimento delle teorie funzionaliste nella pianificazione urbana e nella progettazione dei nuovi interventi di edilizia residenziale pubblica. Per un verso, tra gli anni quaranta e gli anni ottanta, Berlino rileva una pesante contrazione demografica, l'isolamento politico,

la separazione interna del Muro, gli effetti di una pianificazione urbana fortemente influenzata dal sdoppiato piano politico che deriva dalla fondazione nel 1949 dei due stati tedeschi, la GDR e la DDR. Per altro verso, Napoli osserva una nuova fase di immigrazione che si aggiunge alla naturale crescita demografica del primo dopoguerra, lo sviluppo urbano dei sobborghi e dei principali centri dell'entroterra costiero, l'espansione fisica ma non amministrativa dei confini della città, l'inadeguatezza ed il costante ritardo del piano amministrativo-urbanistico nella gestione dei fenomeni sociali ed urbani. Si tratta in pratica di una fase carica di contrasti che coincide con l'instaurazione delle nuove repubbliche liberali in Germania ed Italia, e con la definitiva affermazione della questione abitativa e della residenza popolare che assurge, in ambito socialista, al rango di elemento funzionale alla stessa costruzione statale. Lo studio indaga la relazione tra sviluppo urbano ed edilizia residenziale pubblica e si propone come strumento per la riflessione critica e per la valutazione informata della condizione contemporanea. Le indagini e le valutazioni storiche che esso raccoglie si concentrano sugli interventi realizzati a Berlino e a Napoli nei primi quarant'anni del dopoguerra, ovvero nel periodo in cui la questione abitativa diviene urgente e centrale per vari ordini di motivi sia in termini politici che urbanistici. Lo sguardo si concentra sui luoghi dell'abitare, la città e la casa; indaga e confronta la scala teorica e quella reale, il rapporto tra innovazione e recezione culturale; confronta i piani del progetto, della costruzione e della successiva manutenzione degli interventi residenziali, tra le aspettative democratiche e l'adeguatezza del sistema amministrativo nel gestirli. Si tratta di passaggi che hanno un effetto diretto sull'identità sociale che, di risposta, ispira e struttura la nuova città attraverso un dialogo tra forma e contenuto (il passato) che procede per progressivi e reciproci adattamenti. Nella selezione dei casi studio sono stati privilegiati interventi di "periferia", ovvero quelli in cui le culture della pianificazione e del progetto, e le tendenze teoriche ed estetiche si sono potute manifestare nella maniera più completa. Come si vedrà, tuttavia, la periferia non coincide necessariamente con i margini geografici delle città: sia a Berlino che a Napoli gli eventi storici o la particolare topografia hanno dislocato la condizione "periferica" lungo un raggio che solo idealmente conduce dal centro della città. Da un punto di vista sociologico, e per la coincidenza di diversi fattori, inoltre, gli stessi

interventi residenziali generano al loro interno la condizione periferica che si manifesta generalmente in degrado degli spazi comuni, mancanza di prossimità, emarginazione sociale. I materiali del testo sono organizzati in tre parti: nel primo capitolo Documentation si introduce al contesto storico, amministrativo ed urbanistico e si presentano schematicamente e secondo un criterio uniforme i dodici casi studio selezionati; nel secondo capitolo Comparison, che, come il primo, è stato redatto dai giovani ricercatori coinvolti nel progetto di ricerca, vengono meglio presentate tre questioni teoriche emerse nel corso dei laboratori: la capacità del progetto di coinvolgere il piano sociale; lo sperimentalismo degli interventi, in particolare per tecnologia costruttiva, approccio sociale e partecipazione democratica; il rapporto tra il piano amministrativo-pubblico ed il piano civico-privato nelle fasi di realizzazione e mantenimento dei programmi residenziali. Il terzo capitolo, In-Depth-Analysis, raccoglie i contributi degli studiosi coinvolti per fornire un'analisi storica e critica articolata dei casi di studio selezionati e del più ampio contesto urbano e sociale. Infine, le conclusioni raccolgono e presentano i principali nodi teorici emersi nel corso della ricerca in una prospettiva aperta alla condizione contemporanea. La pubblicazione restituisce e meglio sviluppa sul piano documentale e critico i materiali raccolti nel corso dei due laboratori tenuti nel 2019 presso la Technische Universität di Berlino, Dipartimento di Urbanistica e Sviluppo urbano sostenibile "Habitat Unit," e l'Università della Campania "Luigi Vanvitelli," Dipartimento di Architettura e Disegno Industriale di Aversa, nell'ambito dell'omonimo progetto di ricerca finanziato dal DAAD (Servizio Tedesco per lo Scambio Accademico).

Contesting Femicide May 09 2023 Focusing on femicide, this book provides a contemporary re-evaluation of Carol Smart's innovative approach to the law question as first outlined in her ground-breaking book, *Feminism and the Power of Law* (Routledge 1989). Smart advocated turning to the legal domain not so much for demanding law reforms as construing it as a site on which to contest gender and more particularly, gendered constructions of women's experiences. Over the last 30 to 40 years, feminist law scholars and activists have launched scathing trans-jurisdictional critiques of the operation of provocation defences in hundreds of femicide cases. The evidence unearthed by feminist scholars that these defences operate in profoundly sexed ways is unequivocal.

Accordingly, femicide cases have become critically important sites for feminist engagement and intervention across numerous jurisdictions. Exploring an area of criminal law that was not one of Smart ' s own focal concerns, this book both honours and extends Smart ' s work by approaching femicide as a site of engagement and counter-discourse that calls into question hegemonic representations of gendered relationships. Femicide cases thus provide a way to continue the endlessly valuable discursive work Smart advocated and practised in other fields of law: both in articulating alternative accounts of gendered relationships and in challenging law ' s power to disqualify women ' s experiences of violence while privileging men ' s feelings and rights.

Attualità Lacaniana 30 Apr 15 2021 Sappiamo bene quanta poca luce la scienza abbia saputo proiettare sin qui sull ' enigma di questo mondo, e non c ' è chiacchiera di filosofi che possa cambiare questa realtà; solo proseguendo pazientemente il lavoro indefesso che tutto subordina alla ricerca della certezza, si può produrre a poco a poco un mutamento. Quando il viandante canta nell ' oscurità, rinnega la propria apprensione, ma non per questo vede più chiaro. Sigmund Freud, Inibizione, sintomo e angoscia Questo erra meriterebbe di essere sottolineato con la parola transumante, la pretesa umanità non attende altro che a una naturalità di transito, che postula la trascendenza. Il mio successo non è connotato da nessuna riuscita ai miei occhi. Come Freud, non credo se non nell ' atto mancato, ma l ' atto mancato in quanto rivelatore del sito, della situazione del transito in questione, con transfert in gioco. Semplicemente, questo trans, occorre riportarlo alla giusta misura. Il mio successo, dunque – la mia successione, è questo che vuol dire – resterà in questo transitorio? È quanto di meglio può accaderle poiché, ad ogni modo, non vi è nessuna chance che l ' human-trans approdi mai ad alcunché. Dunque, tanto vale la peregrinazione senza fine. Jacques Lacan, Seminario RSI Poi, all ' età di vent ' anni, ebbi la sfortuna di cadere nelle reti di un medico, psichiatra, psicoanalista, di 63 anni, noto come il lupo bianco in quanto era una pecora nera. Nel corso del tempo, divenne una mela marcia (transizione!). Jacques-Alain Miller, Docile al trans Eppure non ha senso rimpiangere il passato, provare nostalgia per quello che crediamo di essere stati. Ogni sette anni si rinnovano le cellule: adesso siamo chi non eravamo. Anche vivendo – lo dimentichiamo – restiamo in carica per poco. Antonella Anedda, *Historiae* In questi ultimi decenni

abbiamo assistito, basiti, all'ammutolire delle generazioni, alla sottrazione di parola che è un attentato alla capacità di pensare. Il virus, che da oltre un anno ci tiene col fiato sospeso, non a caso, colpisce per primo le vie respiratorie: la potenza simbolica di questo fatto non può restare inespresa. Conservare il fiato dell'anima, la lingua, diventa il gesto urgentemente politico di questo momento; altrimenti, non c'è più pensiero di sorta. Giacomo Trinci, Lettera all'ignota gioventù

New Metropolitan Perspectives Mar 03 2020 This book explores the role of cities and the urban–rural linkages in spurring innovation embedded in spatial planning, strategic and economic planning, and decision support systems. In particular, the contributions examine the complexity of the current transitional phase towards achieving smart, inclusive and sustainable growth, and investigate the post-2020 UE cohesion policy. The main topics include: Innovation dynamics and smart cities; Urban regeneration – community-led and PPP; Inland and urban area development; Mobility, accessibility, infrastructures; Heritage, landscape and Identity; and Risk management, Environment and Energy. The book includes a selection of articles accepted for presentation and discussion at the 3rd International Symposium New Metropolitan Perspectives (ISTH2020), held at the University of Reggio Calabria, Italy on 22–25 May 2018. The symposium, which addressed the challenge of local knowledge and innovation dynamics towards territory attractiveness, hosted the final event of the MAPS-LED project under Horizon2020 – MSCA RISE.

The General Law of Capitalist Accumulation in Latin America and Beyond Aug 08 2020 Through this edited collection, the contributing authors examine the pertinence and actuality of Marx's general law while analyzing past and present issues in political economy in Latin America and beyond.

Tiziano Mannoni. Attualità e sviluppi di metodi e idee. Volume 1 Sep 01 2022 Volume 1 Sezioni: 1. Ricordando Tiziano: lezioni e prospettive 2. Produzioni 3. Materiali e tecniche costruttive Come comitato scientifico e organizzativo, il compito che ci siamo assunti non è stato semplicemente rendere omaggio alla memoria di Tiziano Mannoni, e ricordarne l'opera a dieci anni dalla scomparsa, ma evidenziare cosa, e quanto, dei suoi insegnamenti è presente, e vitale, nelle ricerche che conduciamo.

L'opera è rivolta soprattutto a chi non ha avuto l'occasione di conoscere l'uomo e il ricercatore che, a nostro avviso, più di altri si è distinto, in Liguria e non solo, per costruire un'archeologia a tutto tondo. Non diciamo 'globale' perché, come lo stesso Mannoni sosteneva negli ultimi anni, il termine può dare un'idea sbagliata: di chi eccede in ambizione, non riconosce la complessità dei problemi storici, confonde la propria ricerca con il tutto.

The New World of Work Oct 10 2020 Actors in the world of work are facing an increasing number of challenges, including automatization and digitalization, new types of jobs and more diverse forms of employment. This timely book examines employer and worker responses, challenges and opportunities for social dialogue, and the role of social partners in the governance of the world of work.

Female Cultural Production in Modern Italy Apr 27 2022 This book is the first critical interdisciplinary examination in English of Italian women's contributions to intellectual, artistic, and cultural production in modern Italy. Examining commonalities and diversities from the country's Unification to today, the volume provides insight into the challenges that Italian women engaged in cultural production have faced, and the strategies they have deployed in order to achieve their objectives. The essays address a range of issues, from women's self-identification and public ownership of their professional roles as laborers in the intellectual and cultural realm, to questions about motherhood and financial remuneration, to the role of creative foreign women in Italy. Through critical analysis and direct testimony from new and typically marginalized voices, including an Arab-Italian writer, an Italian-Dominican filmmaker, and a transgender activist, new forms of ongoing struggle emerge that redefine the culturally diverse landscape of female intellectual and creative production in Italy today. The volume rethinks a solely national "Made in Italy" reading of the subject of female intellectual labor, demonstrating instead the wide network of influences and relationships that have existed for Italian women in their professional aspirations.

Dynamic Epigraphy Feb 11 2021 This volume, with origins in a panel at the 2018 Celtic Conference in Classics, presents creative new approaches to epigraphic material, in an attempt to 'shake up' how we deal with inscriptions. Broad themes include the embodied experience of epigraphy, the unique capacities of epigraphic language as a genre, the

visuality of inscriptions and the interplay of inscriptions with literary texts. Although each chapter focuses on specific objects and epigraphic landscapes, ranging from Republican Rome to early modern Scotland, the emphasis here is on using these case studies not as an end in themselves, but as a means of exploring broader methodological and theoretical issues to do with how we use inscriptions as evidence, both for the Greco-Roman world and for other time periods. Drawing on conversations from fields such as archaeology and anthropology, philology, art history, linguistics and history, contributors also seek to push the boundaries of epigraphy as a discipline and to demonstrate the analytical fruits of interdisciplinary approaches to inscribed material. Methodologies such as phenomenology, translanguaging, intertextuality and critical fabulation are deployed to offer new perspectives on the social functions of inscriptions as texts and objects and to open up new horizons for the use of inscriptions as evidence for past societies.

Italy Transformed Apr 08 2023 The decade commencing with the great crash of 2008 was a watershed period for Italian politics, involving fundamental and dramatic changes, many of which had not been anticipated and which are charted in this book. This comprehensive volume covers the impact of the Eurozone crisis on the Italian economy and its relationship with the European Union, the dramatic changes in the political parties (and particularly the rise of a new political force, the Five Star Movement, which became the largest political party in 2013), the changing role of the Trade Unions in the lives of Italian citizens, the Italian migration crisis, electoral reforms and their impact on the Italian party system (where trends towards bipolarisation appear to be exhausted), the rise of new forms of social protest, changes to political culture and social capital and, finally, amidst the crisis, reforms to the welfare state. Overall, the authors reveal a country, which many had assumed was in quiet transition towards a more stable democracy, that suffers an immense shock from the Eurozone crisis and bringing to the fore deep-rooted structural problems which have changed the dynamics of its politics, as confirmed in the outcome to the 2018 National Elections. This book was originally published as a special issue of South European Society and Politics.

Utopia without Ideology Jan 25 2022 This book explores and proposes original definitions of central terms in political sociology and social

theory, including political culture, imaginary, ideology, and utopia, in a manner that renders the individual definitions consistent with one another as part of a single and general conceptual framework for understanding social action. Through a Weberian distinction between means, ends, and values, together with the thought of Alfred Schütz and phenomenological sociology more generally, it sheds light on the ways in which the book's key concepts make sense of social action, advancing the view that, rather than some promised land or aspiration, utopia is a project of broad and far-reaching collective action realized in its own enactment. As such, the book will appeal to scholars of social theory, political sociology, and political theory.

Representations of Lethal Gender-Based Violence in Italy Between Journalism and Literature Feb 06 2023 This book discusses femicide in Italy, and the cultural conversations that have resulted from feminist discourse on lethal violence against women entering the mainstream, by analyzing journalistic inquiries and literary works produced after 2012. In a global and national context where activism's goals are mainly discursive this study deepens our understanding of the role played by written narratives in the critique of a public interest matter such as gender-based violence. The first part of the book is dedicated to the analysis of three journalistic inquiries published in book format that focus on one or more cases of femicide that happened on the Italian peninsula. The second section draws on the concept of feminist rewriting to propose the analysis of a heterogeneous body of literary texts that explore some of the most controversial and notorious femicide cases covered by previous journalistic, historical, or mythical narratives, before demonstrating the close connection between theoretical and narrative discourse within the analyzed texts. This is a fascinating case study contributing to global understandings of gender-based violence, which will be important for researchers in gender studies, sociology, and media studies.

Conscious Dwelling Jun 29 2022 Through a transdisciplinary perspective, this book examines the complex urban dimension, in front of increasing density, soil consumption, abandoned places, and the recent pandemic which proved megacities particularly inadequate to provide healthy psychophysical conditions. Assuming bodily and emotional comfort as a reference horizon, it tends to inspire the design research overcoming a paradoxical binary logic that separates public and private, outside and

inside, culture and nature, mind and places. The first part of the work explores built spaces and addresses sustainable strategies not only to overcome an ecologic and systemic crisis but also to improve places liveability in our contemporary city. The second part deals with our perception of aesthetic spaces, welcoming the stimuli coming from neuro-aesthetics studies on affordances and atmosphere and encouraging the intersection between interior architecture and design culture and arts. The third part examines relational spaces and how they influence human behaviour, starting from psychological, anthropological, and philosophical perspectives. The book benefits scholars and practitioners interested in interior architecture and design, as well as researchers involved in the relationship between people and places. The new challenge posed by the recent pandemic requires more than ever to rely on consciousness, culture and creativity to increase the intelligence of our surroundings, allowing our sense of belonging and improving our personal and mutual well-being.

[Listening to the Stones: Essays on Architecture and Function in Ancient Greek Sanctuaries in Honour of Richard Alan Tomlinson](#) Jun 17 2021 This book presents a range of topics, conveying the broad scope of Richard Tomlinson 's archaeological quests and echoing his own research methodologies; it is a token of appreciation for a British professor of archaeology, who spread knowledge of the Greek civilization, manifesting the brilliant spirit of the versatile ancient Greek builders.

[Materiality in Roman Art and Architecture](#) Jan 13 2021 The focus of this volume is on the aesthetics, semantics and function of materials in Roman antiquity between the 2nd century B.C. and the 2nd century A.D. It includes contributions on both architectural spaces (and their material design) and objects – types of 'artefacts' that differ greatly in the way they were used, perceived and loaded with cultural significance. With respect to architecture, the analysis of material aesthetics leads to a new understanding of the performance, imitation and transformation of surfaces, including the social meaning of such strategies. In the case of objects, surface treatments are equally important. However, object form (a specific design category), which can enter into tension with materiality, comes into particular focus. Only when materials are shaped do their various qualities emerge, and these qualities are, to a greater or lesser extent, transferred to objects. With a focus primarily on Roman Italy, the

papers in this volume underscore the importance of material design and highlight the awareness of this matter in the ancient world.

Attualità Lacaniana 31 Jan 01 2020 Il soggetto, il soggetto cartesiano, è il presupposto dell' inconscio, l' abbiamo dimostrato a suo luogo. L' Altro è la dimensione esigita dal fatto che la parola si afferma come verità. Fra i due, l' inconscio è taglio in atto. Taglio che ritroviamo governare le due fondamentali operazioni in cui conviene formulare la causazione del soggetto. Jacques Lacan, Posizione dell' inconscio Non già per confutare il famoso parallelismo psico-fisico che, come tutti sanno, è stato dimostrato da lungo tempo essere una fesseria, ma per suggerire che il taglio non è da farsi tra il fisico e lo psichico, bensì tra lo psichico e il logico. Jacques Lacan, Io parlo ai muri Mi riferisco al vuoto a cui deve limitarsi il nostro desiderio, al posto che lasciamo al desiderio perché vi si situi – in breve: al taglio. Il taglio è indubbiamente la modalità più efficace dell' interpretazione analitica. Jacques Lacan, Seminario VI Mi accorderete che l' uno introdotto dall' esperienza dell' inconscio è l' uno della fessura, del tratto, della rottura. [...] La rottura, la fessura, il tratto dell' apertura fa sorgere l' assenza. Jacques Lacan, Seminario XI Quando contrapponiamo l' interpretazione semantica e quella asemantica, possiamo capire perché Lacan utilizzi la parola taglio in senso topologico. Forse potremmo dire che taglio è la nuova parola che sostituisce interpretazione, quando non si tratta di andare nella stessa direzione dell' inconscio, ma di trovare un altro tipo di operazione. Jacques-Alain Miller, Clinica lacaniana L' ultima volta vi ho parlato del concetto di inconscio la cui vera funzione è precisamente quella di essere in relazione profonda, iniziale, inaugurale con la funzione del concetto di Unbegriff – o Begriff dell' Uno originale, ossia il taglio. Jacques Lacan, Seminario XI La candela dice: io mi consumo senza lamentele che pena, quel tuo chiedere durata la pianura dice: io accolgo, accolgo largamente e l' ago dice: perdermi mi piace, stare dimenticato nelle fessure, essere ignorato. E tu? e il coltello dice io taglio i ponti divido un pezzo dall' intero so dare ferite perfette. E tu. Mariangela Gualtieri, Senza polvere e senza peso

Controlling Immigration Through Criminal Law Jun 05 2020 This book provides a systematic and comprehensive overview of the increased role of criminal law in managing migration, from a European, domestic and comparative law perspective. The contributors critically engage with the

current trends leading to the criminalisation of irregular migrants, asylum seekers and those who engage in 'humanitarian smuggling' and the national and common policies calling for a broader use of criminal law measures. The chapters explore the measures used to protect borders and their impact in terms of effectiveness and their ability to strike a fair balance between security and the protection of human rights. The contributors to the book cover a range of disciplines within law, human rights and criminology resulting in a broad understanding of the issues at play.

The Archipelago Dec 12 2020 'An enjoyable, highly readable history that manages to bring murky, often fiendishly complex events into the light' Sunday Times Italy emerged from the Second World War in ruins. Divided, invaded and economically broken, it was a nation that some claimed had ceased to exist. By the 1960s, Italy could boast the fastest-growing economy in the world, as rural society disappeared almost overnight. In *The Archipelago*, acclaimed historian John Foot chronicles Italy's tumultuous history from the post-war period to the present. From the silent assimilation of fascists into society after 1945 to the artistic peak of neorealist cinema, he examines both the corrupt and celebrated sides of the country. While often portrayed as a failed state on the margins of Europe, Italy has instead been at the centre of innovation and change – a political laboratory. This new history tells the fascinating story of a country always marked by scandal but with the constant ability to reinvent itself. Comprising original research and lively insights, *The Archipelago* chronicles the crises and modernisations of over seventy years of post-war Italy, from its fields, factories, squares and housing estates to the political intrigue of Rome.

Feminism, Violence, and Representation in Modern Italy Mar 27 2022 A study of how violence and language affect women in Italy. Can the way a word is used give legitimacy to a political movement? *Feminism, Violence, and Representation in Modern Italy* traces the use of the word “femminicidio” (or “femicide”) as a tool to mobilize Italian feminists, particularly the Union of Women in Italy (UDI). Based on nearly two years of fieldwork among feminist activists, Giovanna Parmigiani takes a broad look at the many ways in which violence inflects the lives of women in Italy. From unchallenged gendered grammar rules to the representation of women as victims, Parmigiani examines the devaluing of women's

contribution to their communities through the words and experiences of the women she interviews. She describes the first uses of the word “ femminicidio ” as a political term used by and within feminist circles and traces its spread to ultimate legitimization and national relevance. The word redefined women as a political subject by building an imagined community of potentially violated women. In doing so, it challenged Italians to consider the status of women in Italian society, and to make this status a matter of public debate. It also problematized the connection between women and tropes of women as objects of suffering and victimhood. Parmigiani considers this exchange within the context of Italian Catholic heritage, a precarious economy, and long-held notions of honor and shame. Parmigiani provides a careful and searing consideration of the ways in which representations of violence and the politics of this representation are shaping the future of women in Italy and beyond.

Animality in Contemporary Italian Philosophy Jul 07 2020 This volume provides an overview of contemporary Italian philosophy from the perspective of animality. Its rationale rests on two main premises: the great topicality of both Italian contemporary philosophy (the so-called “ Italian Theory ”) and of the animal question (the so-called “ animal turn ” in the humanities and the social sciences) in the contemporary philosophical panorama. The volume not only intersects these two axes, illuminating Italian Theory through the animal question, but also proposes an original thesis: that the animal question is a central and founding issue of contemporary Italian philosophy. It combines historical-descriptive chapters with analyses of the theme in several philosophical branches, such as biopolitics, Posthumanism, Marxism, Feminism, Antispeciesism and Theology, and with original contributions by renowned authors of contemporary Italian (animal) philosophy. The volume is both historical-descriptive and speculative and is intended for a broad academic audience, embracing both Italian studies and Animal studies at all levels.
