Carbon and Nutrient Fluxes in Continental Margins Oct 18 2021 This book is a product of the joint JGOFS (Joint Global Ocean Flux Study)/LOICZ (Land–Ocean Interactions in the Coastal Zone) Continental Margins Task Team which was established to facilitate continental margins research in the two projects. It contains significant information on the physical, biogeochemical, and ecosystems of continental margins nationally and regionally and provides a very valuable synthesis of this information and the physical, biogeochemical and ecosystem processes which occur on continental margins. The publication of this book is timely as it provides a very strong foundation for the development of the joint IMBER (Integrated Marine Biogeochemistry and Ecosystems Research)/LOICZ Science Plan and Implemen-

tion Strategy for biogeochemical and ecosystems research in the continental margins and the impacts of global change on these systems. This initiative will move forward integrated biogeochemical and ecosystems research in the continental margins. We thank all the contributors to this volume and especially Kon-Ke Liu who has dedicated a great deal of time to ensuring a high-quality book is published. IMBER Scientific Steering Committee Julie Hall LOICZ Scientific Steering Committee Jozef Pacyna v 1 Preface In general, interfaces between the Earth's larger material reservoirs (i. e. , the land, atmosphere, ocean, and sediments) are important in the control of the biogeochemical dynamics and cycling of the major bio-essential elements, including carbon (C), nitrogen (N), phosphorus (P), sulfur (S), and silicon (Si), found in organic matter and the inorganic skeletons, shells, and tests of benthic and marine organisms.

Histories of Infamy Feb 28 2020 "Roa-de-la-Carrera convincingly shows that Gómara, as well as other historians in the period, cannot easily ignore nor erase the contradictions of the Spanish colonial project." - Luis Fernando Restrepo, University of Arkansas "In an eloquent and thorough exegesis, Roa-de-la-Carrera reveals how and why López de Gómara, having written the best of all possible books in exultation of Spanish imperialism, nevertheless failed to convince the readers of his time." - Susan Schroeder, Tulane University In Histories of Infamy, Cristián Roa-de-la-Carrera explores Francisco López de Gómara's (1511-ca.1559) attempt to ethically reconcile Spain's civilizing mission with the conquistadors' abuse and exploitation of Native peoples. The most widely

read account of the conquest in its time, Gómara's Historia general de las Indias y Conquista de México rationalized the conquistadors' crimes as unavoidable evils in the task of bringing "civilization" to the New World. Through an elaborate defense of Spanish imperialism, Gómara aimed to convince his readers of the merits of the conquest, regardless of the devastation it had wrought upon Spain's new subjects. Despite his efforts, Gómara's apologist text quickly fell into disrepute and became ammunition for Spain's critics. Evaluating the effectiveness of ideologies of colonization, Roa-de-la-Carrera's analysis will appeal to scholars in colonial studies and readers interested in the history of the Americas.
