This volume presents an integrated epidemiologic, social, and economic analysis of the global epidemics of HIV among sex workers in low- and middle-income countries. The book provides a comprehensive review and synthesis of the available public health and social science data to characterize the nature, scope, and complexities of these epidemics. A community empowerment-based approach to HIV

prevention, treatment, and care is outlined and demonstrated to be cost-effective across multiple settings, with a significant projected impact on HIV incidence among sex workers and transmission dynamics overall. The [Global HIV Epidemics among Sex Workers](#) seeks to assist governments, public health implementing agencies, donors, and sex worker communities to better understand and respond to the epidemics among a population facing heightened social and structural vulnerabilities to HIV. The book combines a systematic review of the global epidemiology of HIV among sex workers and in-depth case studies of the epidemiology, policy and programmatic responses and surrounding social contexts for HIV prevention, care and treatment in eight countries. The authors employ mathematical modeling and cost-effectiveness analysis to assess the potential country-level impact of a community empowerment-based approach to HIV prevention, treatment, and care among sex workers when taken to scale in four countries representing diverse sociopolitical contexts and HIV epidemics: Brazil, Kenya, Thailand, and Ukraine. In each setting, greater investment in prevention, treatment, and care for sex workers is shown to significantly reduce HIV. Together these findings underline the urgency of further global investment in comprehensive, human rights-based responses to HIV among sex workers. Children's book awards have mushroomed since the early twentieth-century and especially since the 1960s, when literary prizing became a favored strategy for both commercial promotion and canon-making. There are over 300 awards for English-language titles alone, but despite the profound impact of children's book awards, scholars have paid relatively little attention to them. This book is the first scholarly volume devoted to the analysis of Anglophone children's book awards in historical and cultural context. With attention to both political and aesthetic concerns, the book offers original and diverse scholarship on prizing practices and their consequences in Australia, Canada, and especially the United States. Contributors offer both case studies of particular awards and analysis of broader trends in literary evaluation and elevation, drawing on theoretical work on canonization and cultural capital. Sections interrogate the complex and often unconscious ideological work of prizing, the ongoing tension between formalist awards and so-called identity-based awards — all the more urgent in light of the "We Need Diverse Books" campaign — the ever-morphing forms and parameters of prizing, and scholarly practices of prizing. Among the many awards discussed are the Pura Belpré Medal, the Inky Awards, the Canada Governor General Literary Award, the Printz Award, the Best Animated Feature Oscar, the Phoenix Award, and the John Newbery Medal, giving due attention to prizes for fiction as well as for non-fiction, poetry, and film. This volume will interest scholars in literary and cultural studies, social history, book history, sociology, education, library and information science, and anyone concerned with children's literature. Due to the unique problems they present, and the therapy process issues involved in seeing treatment through to successful completion, these cases are usually considered difficult. The first book to bring the relevant research literature to bear on this thorny clinical problem, DEPRESSION IN MARRIAGE views the marital relationship as a powerful point of therapeutic intervention for depression and offers step-by-step guidance to

clinically flexible treatment. By utilizing a marital discord model of depression, therapists can tap the power of the marital relationship to promote growth and healing rather than work against the powerful forces of the marital dyad. Offering precise guidelines for assessment, intervention, and management, DEPRESSION IN MARRIAGE provides useful clinical measurement tools and uses case vignettes to illustrate practical issues. Interventions are described in detail, with references to the relevant research literature. Whether marital therapy is the primary treatment modality, or an adjunct to individual or somatic interventions, DEPRESSION IN MARRIAGE will help identify useful, practical intervention strategies. Providing a new understanding of the interpersonal aspects of depression, as well as ways in which this understanding can be put to work in therapy, DEPRESSION IN MARRIAGE will be of interest to a wide range of professionals working with depressed individuals or distressed couples. It can also be used as a text for graduate level courses in psychology, marriage and family therapy, and social work.
