His chiseled jaw and silver gaze haunts both my nightmares and my dreams, though I've only ever gotten a glimpse of either. There's a treaty between us and them; mere mortals and the ones who terrify but keep us safe. The contract demands that every year there's an offering and this year I'll walk across that stage presenting myself. We have no idea what to expect if they choose someone, since they haven't done so in generations. The only thing we know is that the ones they take belong to them forevermore. If chosen, you don't come back, or so the story of the treaty goes. Gather and present yourself. This is the offering ... .. and I ... belong to him. The data service contains key energy statistics for over 150 countries and regions. Data are provided in original units for the different types of coal, oil, natural gas, renewables and waste, as well as for electricity and heat. In general, the data are available for 1971 (1960 for OECD countries) to 2014, with preliminary estimates of 2015 production (and trade when available) for natural gas, primary coal and oil. Eat, Pray, Love meets The Rosie Project in this fresh, heartwarming memoir by a man who travels to Verona and volunteers to answer letters addressed to Shakespeare's Juliet, all in an attempt to heal his own heartbreak. Glenn's journey takes him deep into the charming community of Verona, where he becomes involved in unraveling the truth behind Romeo and Juliet. Did these star-crossed lovers actually exist? Why have they remained at the forefront of hearts and minds for centuries? And what can they teach us about love? When Glenn returns home to Canada and resumes his duties as an English teacher, he undertakes a lively reading of Romeo and Juliet with his students, engaging them in passions past and present. But in an intriguing reversal of fate and fortune, his students—along with an old friend—instruct the teacher on the true meaning of love, loss, and moving on. An enthralling tale of modern-day love steeped in the romantic traditions of eras past, this is a memoir that will warm your heart. Meet the Maverick Billionaires's sexy, self-made men from the wrong side of town who survived hell together and now have everything they ever wanted. But when each Maverick falls head-over-heels for an incredible woman he never saw coming, he will soon find that true love is the only thing he ever really needed... Viktor Suvorov is a Soviet army officer who has defected to the West. Here is the full story of the Spetsnaz forces, the Soviet army's secret killer elite. This is the first comprehensive insight for the West into a Soviet "army within an army" whose existence has been known until recently only to a few highly placed people--most of whom would deny it. The spetsnaz Soviet special forces are one of the more shadowy and ruthless secret special forces in the world. Controlled by military intelligence (the GRU), spetsnaz units

are recruited from the ranks of the toughest officers and men in the Soviet Army, the cutting edge of Soviet military might. In modern warfare their primary task is the destruction of enemy tactical nuclear weapons, but the training of anyone selected for spetsnaz prepares him or her for an unlimited range of tasks--from undercover activity as a member of a Soviet Olympic sports team to piloting a midget submarine. As an officer in the GRU, the author was directly involved in the control and planning of spetsnaz. In this revealing and sometimes shocking book, he talks about his own experience; about the military code of an armed force that kills its own wounded; about the weapons, strategy, and training. For anyone interested in the true military capability of the Soviet Union, this book is essential reading. She never wanted to be Omega. Ianthe is trapped in the clutches of the Alpha who claimed her against her will. She wants to fight him, even as every cell in her body has come to crave his touch. But there is more to Legion than meets the eye and Ianthe will suffer before she learns all of his secrets. Omega's Capture is the second in a series which immediately follows the events of Omega's Deception (Omega's of Pandora, Book One), This series features an over the top Alpha hero in a dystopian world. This book is for anyone who likes their romance with power exchange and a splash of darkness, especially fans of Addison Cain, Zoe Blake and Loki Renard. This text examines the startling and rapidly changing developments in media technology, especially as they affect journalism and the news media. We now stand at the threshold of a revolution in the news and entertainment media, and those media as we know them today may soon cease to exist. Whereas it had always been a simple matter to distinguish between newspapers, broadcast television, cable television, motion pictures, telephones, and computers, those distinctions are quickly blurring as a new universal media looms on the horizon. Here Jim Willis examines the new multimedia--and the concept of turbonews--and how journalism, the news media, and our lifestyles will be changed forever. Her. A Deal with the Devil is book two in the Devil trilogy by USA Today bestselling author Amelia Wilde. The Devil and the Deep Blue Sea must be read first. Early integration is the key to success in industrial biotechnology. This is as true when a selected wild-type organism is put to work as when an organism is engineered for a purpose. The present volume Engineering and Manufacturing for Biotechnology took advantage of the 9th European Congress on Biotechnology (Brussels, Belgium, July 11-15, 1999): in the topics handled and in the expertise of the contributors, the engineering science symposia of this congress offered just what was needed to cover the important topic of integration of process engineering and biological research. The editors have solicited a number of outstanding contributions to illustrate the intimate interaction between productive organisms and the numerous processing steps running from the initial inoculation to the packaged product. Upstream processing of the feed streams, selection of medium components, product harvesting, downstream processing, and product conditioning are just a few major steps. Each step imposes a number of important choices. Every choice is to be balanced against time to market, profitability, safety, and ecology. Originally written as a gift from a father to a son, the book's simple message--to be understanding, thoughtful, and appreciative--has been enjoyed by men and women of all ages. This edition with all three

volumes has been redesigned for a new generation. 1891 . . . Spinster librarian, Olive Wilkins, is shocked to learn of her brother's violent death at a saloon gaming table and her sister-in-law's subsequent murder, traveling far from her staid life to rescue her niece and nephew, now orphans. She arrives to find the circumstances of her brother's life deplorable and her long held beliefs of family and tradition, shaken. Accustomed to the sophistication of Philadelphia, Olive arrives in Spencer, Ohio, a rough and tumble world she is not familiar with, facing two traumatized children. Her niece and nephew, Mary and John, have been living with a neighboring farmer, widower Jacob Butler, the father of three young children of his own and a man still in pain from the recent loss of his wife. Real danger threatens Olive and Mary and John while Jacob and his own brood battle the day-to-day struggles for survival. Will Olive and Jacob find the strength to fight their battles alone or together? Will love conquer the bitterness of loss and broken dreams? Will her shameful secret be exposed? Evie Katner has a shameful secret. One that forced her to abandon a very successful acting career. But now she's back and...and she wants this role! It was perfect for her! It was everything she needed to prove her place as a serious actor! The only thing...she had to trick the director/producer into giving her the part. Brock Severson is furious when he realizes that the woman who tried out for the role is none other than Evelyn Katner. She left the industry under a cloud of shame. No one knew why she'd left the acting world - but rumors were rampant! He couldn't allow Evie to ruin his film but...but she's perfect for the role. Evie brought more to the complicated role than he could have hoped for! Plus, he's stunned at how much he wanted her! Could he keep his mind on the job when his body wanted nothing more than to ignore the past and risk it all with the dangerous Evie? A collection of feminist cultural studies essays on children's television. Without revealing the fact that she is the daughter of an earl, Octavia has been producing fabulous results as Lisette and Philippa's governess. Edward is stunned by her competence, backed by her intellect and kindness, but he has been suffering from the attraction he feels for her. Could they ever be together despite the differences in their social standings? He makes an effort to distance himself from Octavia, but the farther apart they are, the greater his longing for her becomes. One day, he finds her asleep in the house and is unable to fight the temptation to touch her... This is a book for people who are struggling to find their way out of a cave of anxiety, depression, and suicidal thoughts—and for anyone who cares for someone who's been lost in that cave. Suicide is now the leading cause of death among young adults 18-34, and the fourth-leading cause of death among the middle-aged. Just as a computer's hardware determines its foundational capabilities and its software determines how it interfaces with the world, humans' hardware is tied to our biology and our software dictates how we relate to others and ourselves. Together, these parts of our identity determine our functionality, limitations, and possibilities. We become the story we have decided to live inside. When Jesus said, "I have come to set captives free," He meant that He came to "de-bug" our programming. Jesus invites us to partner with Him to bring to the surface and then move past our debilitating bugs. This book is a conversation between a minister and a psychiatrist. Informed by the clinical realities of anxiety, depression, and suicide, the authors draw from the transformational relational strategies of Jesus to chart a path into life and freedom. The only way he'll agree to the story about the great and reclusive writer, D. B. Carter is if I agree to spend the week with him. He thinks that the reason that I left is that I don't want him. Nothing could be from the truth. He thinks I was insulted. He's wrong. I have a fire in my body that burns just for him. Still, I leave. He shouldn't have asked for something like that. All that it did was push me away. But I have to write this story to save my job. It won't be published for a while and I'll have time to convince him to go on the record. At least, that's what I think. But then the article comes out and he shows up at my house. He's angry. I'm mad. What happens when that fire between us starts to ignite? What happens when he pulls me close and doesn't let go? Praise for Charlotte Byrd "BEST AUTHOR YET! Charlotte has done it again! Plant biomass is attracting increasing attention as a sustainable resource for large-scale production of renewable fuels and chemicals. However, in order to successfully compete with petroleum, it is vital that biomass conversion processes are redesigned to minimize costs and maximize yields. Advances in pretreatment technology are critical in order to develop high-yielding, cost-competitive routes to renewable fuels and chemicals. Aqueous Pretreatment of Plant Biomass for Biological and Chemical Conversion to Fuels and Chemicals presents a comprehensive overview of the currently available aqueous pretreatment technologies for cellulosic biomass, highlighting the fundamental chemistry and biology of each method, key attributes and limitations, and opportunities for future advances. Topics covered include:

- The importance of biomass conversion to fuels
- The role of pretreatment in biological and chemical conversion of biomass
- Composition and structure of biomass, and recalcitrance to conversion
- Fundamentals of biomass pretreatment at low, neutral and high pH
- Ionic liquid and organosolv pretreatments to fractionate biomass
- Comparative data for application of leading pretreatments and effect of enzyme formulations
- Physical and chemical features of pretreated biomass
- Economics of pretreatment for biological processing
- Methods of analysis and enzymatic conversion of biomass streams
- Experimental pretreatment systems from multiwell plates to pilot plant operations

MfM ménage romance from USA Today bestselling author Julia Sykes Two darkly domineering alpha males. They say I don't have to choose. They both want me. Together. The three of us. When they hold me in their arms, I feel safe, cherished. I'm still their captive, but I'm no longer certain if I want to be free of them. They swear they only kidnapped me for my own protection, and after a terrifying attack by one of their enemies, I'm starting to believe them. If I give myself to them, can my alluring criminal captors protect me? Or is their world too dangerous for even their strong arms to shield me from harm? Keywords: MfM ménage, Daddy romance, mafia romance, kidnapping, romantic suspense, new adult The consumption of petroleum has surged during the 20th century, at least partially because of the rise of the automobile industry. Today, fossil fuels such as coal, oil, and natural gas provide more than three quarters of the world's energy. Unfortunately, the growing demand for fossil fuel resources comes at a time of diminishing reserves of these nonrenewable resources. The worldwide reserves of oil are sufficient to supply energy and chemicals for only about another 40 years, causing widening concerns about rising oil prices. The use of biomass to produce energy is only one form of renewable energy that can be utilized to reduce the impact of energy production and use on the global environment. Biomass can be converted into three main products such as energy, biofuels and fine chemicals using a number of different processes. Today, it is a great challenge for researchers to find new environmentally benign methodology for biomass conversion, which are industrially profitable as well. This book focuses on the conversion of biomass to biofuels, bioenergy and fine chemicals with the interface of biotechnology, microbiology, chemistry and materials science. An international scientific authorship summarizes the state-of-the-art of the current research and gives an outlook on future developments. "A sexy, fast-paced, and downright addictive read. I

devoured every word of Mia's journey." -Meghan March, USA Today Bestselling Author Synopsis Life, Love, Laughter. Three things I never expected to experience in the month of giving thanks, but that is just what I received. Wes had survived Hell on Earth, and was back where he was meant to be...in my arms and my bed. For good. There would be no breaking us apart after the trauma we experienced up to this point. My new job with Century Production sent me to the big apple to interview celebrities for a special segment on being thankful. What is a girl to do when she has an entire host of celebrity friends from her past year of travels? You better believe I called up my friends Mason Murphy, all-star pitcher for the Red Sox, and Anton Santiago, the Latin Lov-ah, to participate. They were all too happy to oblige, only my guy's feathers were a bit ruffled by the ease with which they came running. Add in my new family and you've got a fairytale Thanksgiving. Except for one tiny detail...the single seat at the table, left open by the hole in my heart that only one person could fill. \*\*\* In the eleventh book of the Calendar Girl serial, Mia is off to New York City to film a segment for her new job. Now that her debt has been paid, and the threat from her ex is gone, she no longer has to live life as an escort. Only life has thrown her some new challenges to round out her year. Each installment in the Calendar Girl Serial will release every month throughout 2015. Warning: This book is designed for audiences 18+ due to language and graphic sexual content. America is a corporatized society defined by a culture of consumerism, and the youth market is one of the groups that corporations target most. By marketing directly to children, through television, movies, radio, video games, toys, books, and fast food, advertisers have produced a "kinderculture." In this eye-opening book, editor Shirley R. Steinberg reveals the profound impact that our purchasing-obsessed culture has on our children and argues that the experience of childhood has been reshaped into something that is prefabricated. Analyzing the pervasive influence of these corporate productions, top experts in the fields of education, sociology, communications, and cultural studies contribute incisive essays that students, parents, educators, and general readers will find insightful and entertaining. Including seven new chapters, this third edition is thoroughly updated with examinations of the icons that shape the values and consciousness of today's children, including Twilight, True Blood, and vampires, hip hop, Hannah Montana, Disney, and others.
