Kurt Austin must find a vanished ship and stave off a global catastrophe in the latest novel in the #1 New York Times-bestselling series created by the “grand master of adventure” Clive Cussler. A freighter carrying top-secret computers of unparalleled capability disappears in the Western Pacific. While searching for a lost treasure that once belonged to the famous Chinese pirate queen, Ching Shih, Kurt Austin and Joe Zavala are redirected to look for the missing vessel. Discovering that the sinking of the ship is just part of an intricate web of deception, they find themselves in the middle of a cyber-war between rival groups of hackers, both of whom want to control the flow of data around the world. With no allies except a group of pirates who operate under their own crude laws, Kurt and Joe must rescue a colleague held hostage—while keeping the computers out of Russian or Chinese hands and the world’s digital information safe from the hackers. A modern, objective

appraisal of the development of seamanship among the major navies of the world from the 17th to the 19th century. The ultimate book for anyone who has dreamed of building a boat. The dory has seen duty as a fishing boat, lumberman's batteau, lifeboat, recreational rowing boat, and racing sailboat. The most comprehensive book about dories ever published, this is at once a history of the dory, a practical handbook on dory building, and a compendium of 23 dory designs with full construction details. The author, a longtime contributor to National Fisherman, and the illustrator, Sam Manning, are perhaps the foremost experts on the subject. A steady stream of letters and photographs to the late John Gardner from successful dory builders worldwide has been testimony to the widespread popularity and influence of this book.

Acoustic Properties: Radio, Narrative, and the New Neighborhood of the Americas discovers the prehistory of wireless culture. It examines both the coevolution of radio and the novel in Argentina, Cuba, and the United States from the early 1930s to the late 1960s, and the various populist political climates in which the emerging medium of radio became the chosen means to produce the voice of the people. Based on original archival research in Buenos Aires, Havana, Paris, and the United States, the book develops a literary media theory that understands sound as a transmedial phenomenon and radio as a transnational medium. Analyzing the construction of new social and political relations in the wake of the United States' 1930s Good Neighbor Policy, *Acoustic Properties* challenges standard narratives of hemispheric influence through new readings of Richard Wright's cinematic work in Argentina, Severo Sarduy's radio plays in France, and novels by John Dos Passos, Manuel Puig, Raymond Chandler, and Carson McCullers. Alongside these writers, the book also explores Che Guevara and Fidel Castro's *Radio Rebelde*, FDR's fireside chats, Félix Caignet's invention of the radionovela in Cuba, Evita Perón's populist melodramas in Argentina, Orson Welles's experimental New Deal radio, Cuban and U.S. "radio wars," and the 1960s African American activist Robert F. Williams's proto-black power *Radio Free Dixie*. From the doldrums of the Great Depression to the tumult of the Cuban Revolution, *Acoustic Properties* illuminates how novelists in the radio age converted writing into a practice of listening, transforming realism as they struggled to channel and shape popular power. GOOD

*SAILBOAT DESIGNS - 32 Daysailers, Camp-Cruisers, & Weekenders FINE STUDY PLANS FROM TOP DESIGNERS: * Sail Plans* Complete Hull Lines* Arrangement Drawings* Construction Sections* Full Particulars* Designers' Contacts* Insightful Commentary "Just about all of these stories are based on the out-of-doors of the southeastern United States, a region known for great storytellers."--Jacket. Well-known as the editor of the best-selling annual *Mariner's Book of Days*, Peter Spectre lives in Spruce Head, Maine. David Stimson grew up on Cape Cod, Massachusetts, and learned boatbuilding while working in the local boatyards. During this time, he developed an eye for boat design from Merton Long, a retired catboat builder who became his friend and mentor. David's love of traditional boats was further inspired by the writings of John Gardner and Pete Culler in the 1970's and by *Wooden Boat Magazine*. He now lives in Boothbay, Maine, with his wife, Tamora and two teenage boys, Abraham and Nathaniel. He is a sailing charter captain during the summer, and designs and builds boats at Stimson Marine, Inc. in Boothbay. Reprint of the *Chapelle (Search for Speed Under Sail)* original published by Norton in 1941. Now printed on acid-free paper and with a new foreword by Jonathan Wilson. Annotation copyright by Book News, Inc., Portland, OR*

Critical Theory Today is the essential introduction to contemporary critical theory. It provides clear, simple explanations and concrete examples of complex concepts, making a wide variety of commonly used critical theories accessible to novices without sacrificing any theoretical rigor or thoroughness. This new edition provides in-depth coverage of the most common approaches to literary analysis today: feminism, psychoanalysis, Marxism, reader-response theory, new criticism, structuralism and semiotics, deconstruction, new historicism, cultural criticism, lesbian/gay/queer theory, African American criticism, and postcolonial criticism. The chapters provide an extended explanation of each theory, using examples from everyday life, popular culture, and literary texts; a list of specific questions critics who use that theory ask about literary texts; an interpretation of F. Scott Fitzgerald's *The Great Gatsby* through the lens of each theory; a list of questions for further practice to guide readers in applying each theory to different literary works; and a bibliography of primary and secondary works for further reading. This study is part of the

work done in connection with the restoration of the old fishing establishment at Grand-Grave, which is now in Forillon National Park. Its contents should help in the historical interpretation of the social and economic life of merchants and fishermen who lived in Forillon. The archives of William Hyman and Sons (1845-1967) formed most of the documentary basis for the work. The guiding principle for the work was economic anthropology, and its purpose to show how Gaspé society was shaped by the manner in which the production of dried cod was organized. Gaspé was settled and populated through a systematic exploitation of cod, so that a study of this process constitutes a most valuable means of access to its history. The inaugural title in our exclusive new series of books about traditional boats and traditional seamanship. Wooden boats didn't disappear with the invention of GRP. Building them is a classic craft that attracts people with a keen interest in traditional boats and is a thriving activity amongst professional craftsmen and DIY boatbuilders alike. This thoroughly modern book aimed at the novice builder and accessible to the amateur takes a fresh new approach to a timeless activity. The focus is on classic boat construction and restoration, but at all stages modern methods, materials and techniques are employed, together with step-by-step diagrams and explanations. Well illustrated with colour photos and detailed close-up watercolour illustrations, this book will be invaluable for students of boat design and construction, do-it-yourself boatbuilders and even modelmakers. A landmark in wooden boat building books. This volume explores the aesthetic dimensions of biblical poetry, offering close readings of poems across the Hebrew Bible/Old Testament. Composed of essays by fifteen leading scholars of biblical poetry, it offers creative and insightful close readings of poems from across the canon of the Hebrew Bible/Old Testament (Psalms, wisdom poetry, Song of Songs, prophecy, and poetry in biblical narrative). The essays build on recent advances in our understanding of biblical poetry and engage a variety of theoretical perspectives and current trends in the study of literature. They demonstrate the rewards of careful attention to textual detail, and they provide models of the practice of close reading for students, scholars, and general readers. They also highlight the rich aesthetic value of the biblical poetic corpus and offer reflection on the nature of poetry itself as a

meaningful and enduring form of art. Dozens of detailed drawings plus delightful descriptions and reminiscences of the boats and the people who loved them, the text accompanying each design centers on the background of each boat rather than on a technical study. Each essay is as different as the boat it describes, sometimes explaining a detail of the building process, the origins of a design, the individuals involved, or the evolution of a yacht type. This series presents biographies of deceased members of the National Academy of Engineering. Selected by the Modern Library as one of the 100 best nonfiction books of all time From the Modern Library's new set of beautifully repackaged hardcover classics by Truman Capote—also available are *Breakfast at Tiffany's* and *Other Voices*, *Other Rooms* (in one volume), *Portraits and Observations*, and *The Complete Stories* Truman Capote's masterpiece, *In Cold Blood*, created a sensation when it was first published, serially, in *The New Yorker* in 1965. The intensively researched, atmospheric narrative of the lives of the Clutter family of Holcomb, Kansas, and of the two men, Richard Eugene Hickock and Perry Edward Smith, who brutally killed them on the night of November 15, 1959, is the seminal work of the "new journalism." Perry Smith is one of the great dark characters of American literature, full of contradictory emotions. "I thought he was a very nice gentleman," he says of Herb Clutter. "Soft-spoken. I thought so right up to the moment I cut his throat." Told in chapters that alternate between the Clutter household and the approach of Smith and Hickock in their black Chevrolet, then between the investigation of the case and the killers' flight, Capote's account is so detailed that the reader comes to feel almost like a participant in the events. Long before half-hull models became a staple of marine museums and living room walls, they were an essential tool for marine designers and shipbuilders alike. Indeed, the models offered not only a three-dimensional scale rendering of the completed vessel but also a set of comprehensive construction plans for the shipwright. Even in these days of CAD and 3-D printers, the model can still serve today's builders by offering the opportunity to see what they are getting into and what the lines on their blueprints are actually saying. For the boat owner (or prospective boat owner), building a model can be a great way to spend some cold winter evenings carving an accurate and handsome rendition of the boat of their dreams. *Half-Hull*

Modeling takes the reader through the entire process of making an accurate half model: history, tools, woods, safety, finishes, construction jigs, interpreting and working with lines plans, patternmaking, and constructing both waterline and buttock lift models. For those who already own a classic model and would like to build a replica, the book also offers instructions on how to build a measuring device to capture the lines of a hull and develop a set of lines plans. The Art of Sculling provides novice and experienced scullers with a comprehensive, illustrated guide to the equipment, techniques, and physiology of the sport. Beginners will find step-by-step instructions and photographs for launching and rigging a boat and developing the proper sculling stroke. Experienced rowers will find guidelines for developing training programs. Other chapters cover advanced technique, racing, sculling in team boats, safety, and sculling for the more mature. What is Literary Theory? Is there a relationship between literature and culture? In fact, what is Literature, and does it matter? These are the sorts of questions addressed by Jonathan Culler in a book which steers a clear path through a subject often perceived to be complex and impenetrable. It offers discerning insights into theories about the nature of language and meaning, whether literature is a form of self-expression or a method of appeal to an audience, and outlines the ideas behind a number of different schools: deconstruction, semiotics, postcolonial theory, and structuralism amongst them. Green opens up the gripping story of the Book of Acts, highlighting the astonishing, volcanic eruption of faith found there and comparing it to the often halfhearted Christianity of the modern Western world. The insights and wisdom of the late, great boat designer and builder Renowned as one of the last and best of the old-time boatbuilders, Captain R. D. "Pete" Culler provided a guiding light for the wooden boat revival in the 1970s. His designs are classic melds of elegance and utility; his workmanship was akin to artistry; and his teaching and writing a blend of clarity, good sense, insight, and humor. This book brings together the complete texts of Culler's classic works Boats, Oars, and Rowing and Skiffs & Schooners, along with articles from The Mariner's Catalogs and a selection of his timeless boat designs. MARY SHELLY's Frankenstein; or, The Modern Prometheus grew out of a parlor game and a nightmare vision. The story of the book's origin is a famous one, first told in

the introduction Mary Shelley wrote for the 1831 edition of the novel. The two Shelleys, Byron, Mary's stepsister Claire Clairmont, and John William Polidori (Byron's physician) spent a "wet, ungenial summer in the Swiss Alps." Byron suggested that "each write a ghost story." If one is to trust Mary Shelley's account (and James Rieger has shown the untrustworthiness of its chronology and particulars), only she and "poor Polidori" took the contest seriously. The two "illustrious poets," according to her, "annoyed by the platitude of prose, speedily relinquished their uncongenial task." Polidori, too, is made to seem careless, unable to handle his story of a "skull-headed lady." Though Mary Shelley is just as deprecating when she speaks of her own "tiresome unlucky ghost story," she also suggests that its sources went deeper. Her truant muse became active as soon as she fastened on the "idea" of "making only a transcript of the grim terrors of my waking dream": "I have found it! What terrified me will terrify others." The twelve essays in this collection attest to the endurance of Mary Shelley's "waking dream." Appropriately, though less romantically, this book also grew out of a playful conversation at a party. When several of the contributors to this book discovered that they were all closet aficionados of Mary Shelley's novel, they decided that a book might be written in which each contributor-contestant might try to account for the persistent hold that Frankenstein continues to exercise on the popular imagination. Within a few months, two films--Warhol's Frankenstein and Mel Brooks's Young Frankenstein--and the Hall-Landau and Isherwood-Bachardy television versions of the novel appeared to remind us of our blunted purpose. These manifestations were an auspicious sign and resulted in the book Endurance of Frankenstein. Offering major reevaluations of Dryden, Hume, and Johnson, Engell shows that 18th-century criticism cannot be represented by just a few major critics or by generalizations about Augustan taste, neoclassical rules, or "common sense." He presents a complex and highly varied body of theoretical writing and practical application by dozens of critics. Martin Baron has come to Texas with dreams of building a cattle empire, despite savage floods and battle with the Apache. Greg Rossel grew up cruising the waters of New York Harbor and spending time in the boatyards on the south shore of Staten Island where economics (more than anything else) made wooden boats the craft of choice.

He makes his home in Maine where he specializes in the construction and repair of small wooden boats, as well as writing for several publications. Greg has been an instructor at WoodenBoat School in Maine since the mid-1980's, teaching lofting, skiff building, and the "Fundamentals of Boatbuilding". Loosely based on the Odyssey, this landmark of modern literature follows ordinary Dubliners in 1904. Capturing a single day in the life of Dubliner Leopold Bloom, his friends Buck Mulligan and Stephen Dedalus, his wife Molly, and a scintillating cast of supporting characters, Joyce pushes Celtic lyricism and vulgarity to splendid extremes. Captivating experimental techniques range from interior monologues to exuberant wordplay and earthy humor. A major achievement in 20th century literature. The schooner Integrity was built in a famous boatyard in the 1960's in Massachusetts, and she was the dream boat of her owner, Waldo Howland. She cruised in the West Indies and crossed the Atlantic to visit Ireland and England. Then she was sold, and there began a chain of events which led to adventure, chicanery and eventually tragedy. THE STORY: The creative team responsible for a recent Broadway flop (in which three chorus girls were murdered by the mysterious Stage Door Slasher) assemble for a backer's audition of their new show at the Westchester estate of a wealthy angel.
