A brilliant transplant surgeon brings compassion and narrative drama to the fearful reality that every doctor must face: the inevitability of mortality. "Uncommonly moving ... A revealing and heartfelt book." —Atul Gawande, #1 New York bestselling author of *Being Mortal* When Pauline Chen began medical school, she dreamed of saving lives. What she could not predict was how much death would be a part of her work. Almost immediately, she found herself wrestling with medicine's most profound paradox—that a profession premised on caring for the ill also systematically depersonalizes dying. Final Exam follows Chen over the course of her education and practice as she struggles to reconcile the lessons of her training with her innate sense of empathy and humanity. A superb addition to the best medical literature of our time. Study as you go with Cambridge Checkpoints HSC. GCSE Questions & Answers provide questions from past exam papers as well as new questions written by actual GCSE examiners. Questions are divided into topics, with a brief revision summary for each topic, & answers at the back of the book. This volume, edited by Grace Veach, explores leading approaches to foregrounding information literacy in first-year college writing courses. Chapters describe cross-disciplinary efforts underway across higher education, as well as innovative approaches of both writing professors and librarians in the classroom. This seminal work unpacks the disciplinary implications for information literacy and writing studies as they encounter one another in theory and practice, during a time when "fact" or "truth" is less important than fitting a predetermined message. Topics include reading and writing through the lens of information literacy, curriculum design, specific writing tasks, transfer, and assessment.

Because the assumptions that underwrite the question preclude the possibility of a coherent answer, the exam should be canceled and its question rewritten. Envisaging a public administration no longer hostage to the legitimacy

question, Harmon explains how the study and practice of public administration might proceed from adolescence to maturity. Drawing chiefly from pragmatist philosophy, he argues that despite the universal rejection of the “politics/administration” dichotomy on factual grounds, the pseudo-problem of legitimacy nonetheless persists in the guise of four related conceptual dualisms: 1) values and facts, 2) thinking and doing, 3) ends and means, and 4) theory and practice. Collectively, these dualisms demand an impossible answer to the practical question of how we might live, and govern, together in a world of radical uncertainty and interdependence. Only by dissolving them can the legitimacy question (Woodrow Wilson’s ghost) finally be banished, clearing away the theoretical debris that obscures a more vital and useful conception of governance.

Spurred by the success of the first stress test of US banks toward the end of the global economic crisis in 2009, stress testing of large financial institutions has become the cornerstone of banking supervision worldwide. The aim of the tests is to determine which banks are adequately capitalized under severe economic shocks and to order corrective measures for those that are vulnerable. In Banking’s Final Exam, one of the world’s leading experts on banking regulation concludes that the tests administered on both sides of the Atlantic suffer from fundamental weaknesses, leading to a false sense of reassurance about the safety and soundness of the banking system. Some weaknesses can be corrected within the existing bank-capital regime, but others will require bold reforms—including higher

minimum capital requirements for the largest and most systemically-important banks. The banking industry is likely to resist these reforms, but this book explains why their objections do not hold water.
