This second edition of Laster's Catalog combines in one volume the listings from the first edition with the voluminous material that has appeared since 1973, more than doubling the number of entries. It is designed as an aid for the church musician and/or pastor seeking to plan unified worship services. It will also be of use to those church musicians who follow the Liturgical Calendar and plan music appropriate to the appointed lessons, as well as a source for non-church choir directors who wish to locate choral settings based on a particular passage from Scripture. Entries are arranged from Genesis through Revelation. Each main entry citation provides the biblical reference (book, chapter, and verse), as well as a reference to additional passages from Scripture used in the anthem.

composer, arranger, or editor and the title are listed as they appear on the octavo. Information on voicing, solos, and instrumental accompaniment is noted; the name of the publisher, the most recent date of publication and the octavo number appear at the end of each citation, where information on instrumental parts, other versions of the same title, and collections where the work might appear are also listed. Composer and title indexes round off the work. The organ books and part-books used in Durham Cathedral over the centuries form the greatest part of this collection, those from the seventeenth century being particularly well known and of special interest to music scholars and historians. In addition, instrumental music is significantly represented here in the donations made by Philip Falle (1656-1742) and Richard Fawcett (1714-1782), both prebendaries of the cathedral.
