**Cultural Competence for Evaluators** Mar 17 2022 Examines the issue of cultural competence for program evaluators as it relates to African-American, Hispanic, American-Indian, Alaska-Native, and Asian/Pacific Islander-American community groups. The primary objective is to enhance the knowledge base and skills of professionals who are responsible for evaluating AOD abuse prevention programs in ethnic/racial community settings. Complementary chapters provide conceptual frameworks and practical suggestions for evaluators working with each of the ethnic/racial groups, concluding with a final overview of cultural competence.

**Prions and Neurodegenerative Diseases** Nov 01 2020 Prions and Neurodegenerative Diseases, Volume 172, in the Progress in Molecular Biology and Translational Science series, provides the most topical, informative and exciting monographs available on a wide variety of research topics. The series includes in-depth knowledge on the molecular biological aspects of organismal physiology, with this release including chapters on Cell-free amplification of prions: where do we stand? Transgenic mouse models for the study of prion diseases and much more. Includes comprehensive coverage of molecular biology Presents ample use of tables, diagrams, schemata and color figures to enhance the reader's ability to rapidly grasp the information provided Contains contributions from renowned experts in the field Includes comprehensive coverage of molecular biology Presents ample use of tables, diagrams, schemata and color figures to enhance the reader's ability to rapidly grasp the information provided Contains contributions from renowned experts in the field

Bioelectronic Nose May 27 2020 The “bioelectronic nose”, the device which has a similar function to the human smell sensing system, can be realized by combining the olfactory cells or receptors with nanotechnology. In the last two decades, much has been learned about the smell sensing mechanism in biological systems. With knowledge about the biological olfactory system and the techniques for the expression of biological receptor proteins, we are able to utilize biological materials and systems to mimic the biological olfactory system. In addition to the advances in biological and biotechnological area, nanotechnology has progressed to a great degree. The bioelectronic nose is a good example of the integration of biotechnology and nanotechnology. This book describes basic biological sciences of the olfactory system, biotechnology for the production of olfactory biological elements, and nanotechnology for the development of various sensing devices. The purpose of this book is to provide the reader with a concept, basic sciences, fundamental technologies, applications, and perspectives of the bioelectronic nose.

Sessional Papers Jan 03 2021

**The Crisis of Socialist Modernity** Jul 09 2021 In the 1970s industry in the West had reached its limits, precipitating a major discussion about how to solve the crisis. But what was going on in Eastern Europe parallel to this development? Were any similar trends being registered? The authors of this volume pursue the answers to these questions by studying the politics, economics, social and cultural movements of that time in the multiethnic countries of Yugoslavia and the Soviet Union. It becomes clear that these two countries were themselves in the midst of a latent crisis resulting from the global developments around them and from their own internal conflicts. The symptoms of this crisis were well known in expert circles, but not registered fully by either the political leaders or the citizens at large.

**Soft Computing Applications** Apr 06 2021 This book presents the proceedings of the 8th International Workshop on Soft Computing Applications, SOFA 2018, held on 13–15 September 2018 in Arad, Romania. The workshop was organized by Aurel Vlaicu University of Arad, in conjunction with the Institute of Computer Science, Iasi Branch of the Romanian Academy, IEEE Romanian Section, Romanian Society of Control Engineering and Technical Informatics – Arad Section, General Association of Engineers in Romania – Arad Section and BTM Resources Arad. The papers included in these proceedings, published post-conference, cover the research including Knowledge-Based Technologies for Web Applications, Cloud Computing, Security Algorithms and Computer Networks, Business Process Management, Computational Intelligence in Education and Modelling and Applications in Textiles and many other areas related to the Soft Computing. The book is directed to professors, researchers, and graduate students in area of soft computing techniques and applications.

**Quarterly Index to Periodical Literature, Eastern and Southern Africa** Apr 25 2020

**Physics and Chemistry at Low Temperatures** Aug 30 2020 Tunneling reactions in chemistry are characterized by the low-temperature limit when the classical contribution is negligible. Many practical applications benefit from the lack of heat and have a deep physical basis. Interesting advantages of chemical synthesis at low temperatures have also been demonstrated. This book covers fundamental and practical aspects of the processes and experimental and theoretical methods used in the field. The chapters are written by leading scientists who have very strong experience in the selected

topics, and many practical recommendations can be found in this book.

**Hsp90 in Cancer: Beyond the Usual Suspects** Jan 27 2023 Hsp90 in Cancer: Beyond the Usual Suspects, the latest volume in the Advances in Cancer Research series, focuses on the multifunctional molecular chaperone Hsp90 which regulates the post-translational stability and function of a broad repertoire of client proteins and discusses some of the lesser-known aspects of how Hsp90 and its related family members enable oncogenic transformation and malignant progression. Focuses on the multifunctional molecular chaperone Hsp90 which regulates the post-translational stability and function of a broad repertoire of client proteins Highlights the rapidly evolving understanding of the fundamental roles of Hsp90 in cancer biology Discusses the lesser-known aspects of how Hsp90 and its related family members enable oncogenic transformation and malignant progression

**The J. Paul Getty Museum Journal** Jul 29 2020 The J. Paul Getty Museum Journal 14 is a compendium of articles and notes pertaining to the Museum's permanent collections of antiquities, decorative arts, paintings, and photographs. Volume 14 includes articles written by Dietrich von Bothmer, Dietrich Willers, Jean-Louis Zimmermann, Marjatta Nielsen, R. R. R. Smith, Lawrence J. Bliquez, Anne Ratzki-Kraatz, Charissa Bremer-David, Simon Jervis, Gillian Wilson, C. Gay Nieda, Rosalind Savill, M. Roy Fisher, Nigel Glendinning, Burton B. Fredericksen, Graham Smith and Anne McCauley.

**World Wildlife Crime Report 2016** Mar 29 2023 The trafficking

of wildlife is increasingly recognized as both a specialized area of organized crime and a significant threat to many plant and animal species. The World Wildlife Crime Report 2016 takes stock of the present wildlife crime situation with a focus on illicit trafficking of specific protected species of wild fauna and flora, and provides a broad assessment of the nature and extent of the problem at the global level. It includes a quantitative market assessment and a series of in-depth illicit trade case studies.

**Iridium Catalysis** Aug 10 2021 From the contents: Robert H Crabtree: Introduction and History. - Montserrat Diéguez, Oscar Pàmies and Carmen Claver: Iridium-catalysed hydrogenation using phosphorous ligands. - David H. Woodmansee and Andreas Pfaltz: Iridium Catalyzed Asymmetric Hydrogenation of Olefins with Chiral N,P and C,N Ligands. - Ourida Saidi and Jonathan M J Williams: Iridium-catalyzed Hydrogen Transfer Reactions. - John F. Bower and Michael J. Krische: Formation of C-C Bonds via Iridium Catalyzed Hydrogenation and Transfer Hydrogenation. - Jongwook Choi, Alan S. Goldman: Ir-Catalyzed Functionalization of C-H Bonds. - Mark P. Pouy and John F. Hartwig: Iridium-Catalyzed Allylic Substitution. - Daniel Carmona and Luis A. Oro: Iridium-catalyzed 1.3-dipolar cycloadditions.

**Future Access Enablers for Ubiquitous and Intelligent Infrastructures** Sep 30 2020 This book constitutes the refereed post-conference proceedings of the 5th International Conference on Future Access Enablers for Ubiquitous and Intelligent Infrastructures, FABULOUS 2021, held in May 2021. Due to COVID-19 pandemic the conference was held virtually. This year's conference topic covers security of innovative services and infrastructure in traffic, transport and logistic ecosystems. The 30 revised full papers were carefully reviewed and selected from 60 submissions. The papers are organized

in thematic sessions on: Internet of things and smart city; smart environment applications; information and communications technology; smart health applications; sustainable communications and computing infrastructures.

*Topology for Computing* May 19 2022 The emerging field of computational topology utilizes theory from topology and the power of computing to solve problems in diverse fields. Recent applications include computer graphics, computer-aided design (CAD), and structural biology, all of which involve understanding the intrinsic shape of some real or abstract space. A primary goal of this book is to present basic concepts from topology and Morse theory to enable a non-specialist to grasp and participate in current research in computational topology. The author gives a self-contained presentation of the mathematical concepts from a computer scientist's point of view, combining point set topology, algebraic topology, group theory, differential manifolds, and Morse theory. He also presents some recent advances in the area, including topological persistence and hierarchical Morse complexes. Throughout, the focus is on computational challenges and on presenting algorithms and data structures when appropriate.

*Social Determinants of Indigenous Health* Mar 05 2021 The opportunities and comfortable lifestyle available to most Australians have been denied to generations of Indigenous people. As a result some of Australia's original inhabitants suffer from what has been described as 'Fourth World' standards of health. This is out of place in a country that prides itself on egalitarianism and a fair go for all. Shifting the focus from individual behaviour, to the social and political circumstances that influence people's lives and ultimately their health, helps us to understand the origins of poor health. It can also guide action to bring about change. Social Determinants of

Indigenous Health offers a systematic overview of the relationship between the social and political environment and health. Highly respected contributors from around Australia examine the long-term health impacts of the Indigenous experience of dispossession, colonial rule and racism. They also explore the role of factors such as poverty, class, community and social capital, education, employment and housing. They scrutinise the social dynamics of making policy for Indigenous Australians, and the interrelation between human rights and health. Finally, they outline a framework for effective health interventions, which take social factors into consideration. This is a groundbreaking work, developed in consultation with Indigenous health professionals and researchers. It is essential reading for anyone working in Indigenous health.

**Khyber Pakhtunkhwa Health Sector Review** Nov 13 2021 This publication presents a detailed review and assessment of the governance, infrastructure, and financing aspects of hospital care in Pakistan's Khyber Pakhtunkhwa Province. Fast demographic growth, poor access to and utilization of health services, an underfunded public health system, and fragmented reform initiatives are among the key challenges in the province. The Government of Khyber Pakhtunkhwa commissioned the Asian Development Bank to conduct the review to aid the creation of a comprehensive strategy to guide investments and projects in the health sector.

**A History of Yugoslavia** Apr 30 2023 Why did Yugoslavia fall apart? Was its violent demise inevitable? Did its population simply fall victim to the lure of nationalism? How did this multinational state survive for so long, and where do we situate the short life of Yugoslavia in the long history of Europe in the twentieth century? A History of Yugoslavia provides a concise, accessible, comprehensive synthesis of the political, cultural, social, and economic life of

Yugoslavia—from its nineteenth-century South Slavic origins to the bloody demise of the multinational state of Yugoslavia in the 1990s. Calic takes a fresh and innovative look at the colorful, multifaceted, and complex history of Yugoslavia, emphasizing major social, economic, and intellectual changes from the turn of the twentieth century and the transition to modern industrialized mass society. She traces the origins of ethnic, religious, and cultural divisions, applying the latest social science approaches, and drawing on the breadth of recent state-of-the-art literature, to present a balanced interpretation of events that takes into account the differing perceptions and interests of the actors involved. Uniquely, Calic frames the history of Yugoslavia for readers as an essentially open-ended process, undertaken from a variety of different regional perspectives with varied composite agenda. She shuns traditional, deterministic explanations that notorious Balkan hatreds or any other kind of exceptionalism are to blame for Yugoslavia's demise, and along the way she highlights the agency of twentieth-century modern mass society in the politicization of differences. While analyzing nuanced political and social-economic processes, Calic describes the experiences and emotions of ordinary people in a vivid way. As a result, her groundbreaking work provides scholars and learned readers alike with an accessible, trenchant, and authoritative introduction to Yugoslavia's complex history.

**Marble Past, Monumental Present** Dec 02 2020 This survey and synthesis of the structural and decorative uses of Roman remains, particularly marble, throughout the mediaeval Mediterranean, deals with the Christian West - but also Byzantium and Islam, each the inheritor of much Roman territory. It includes a 5000-image DVD.

**Molecular Chaperones in Human Disorders** Jan 23 2020

Molecular Chaperones in Human Disorders, Volume 114 in the

Advances in Protein Chemistry and Structural Biology series, provides an overview of current developments in mechanisms underlying DNA repair and their involvement in maintaining chromatin repair, the balance between chromosomal repair pathways, tumorigenesis, immune signaling and infection-induced inflammation. Chapters in this new release cover Functional principles and regulation of molecular chaperones, Chaperones and retinal disorders, Protein misfolding and degradation in genetic diseases, Chaperone dysfunction in hereditary myopathic diseases, Diseases caused by functional disorder of molecular chaperones residing in the endoplasmic reticulum, and many other timely topics. Describes advances in our understanding on DNA repair mechanisms and the involvement of their dysregulation in promoting diseases Provides an ideal resource for a very wide audience of specialists, researchers and students Contains timely chapters written by well-renown authorities in their field Presents information that is well supported by a number of high quality illustrations, figures and tables

Banking on Self-help Groups Aug 22 2022 Banking on Self-help Groups reviews the existing state of affairs in respect of the SHG (Self-help Group) movement and addresses the question of what should be the next phase of development of the SHGs. It identifies the policy gaps and opportunities that exist for the SHGs to be mainstreamed further into the formal financial system. The author examines elements of strategy and design being adopted by the National Rural Livelihoods Mission as also the potential role of NABARD in the development of SHGs in the future. The study focuses on three core issues pertaining to SHGs. These relate to (i) cost-effectiveness, (ii) sustainability, and (iii) impact, i.e., the development cost of SHGs and SHG-based institutions, the sustainability of SHG models and community institutions fostered by

them, and the economic and social impact on SHG members. The book concludes with a discussion of proposals and institutional arrangements that provide the way forward for the continued and uninterrupted growth of SHGs as an agency for change in the rural sector of India.

**Chronicles of the Cape Fear River, 1660-1916** Dec 26 2022

*Microfinance India* Dec 22 2019 Microfinance India is a part of a series of annual reports on the microfinance sector in India which seeks to document developments, clarify issues, publicize studies, stimulate research, identify policy choices, generate understanding and enhance support for the sector. It is a comprehensive one-stop document that provides the latest data and a holistic view of the sector, combines analysis and description and integrates a variety of topics previously treated separately. The book highlights recent developments in Self Help Groups (SHGs) and SHG Bank Linkage Programs (SBLPs), and focuses on microfinance with regard to the investment scenario in India. It also deals with the burgeoning field of urban microfinance, developments in micro-insurance, and the impact of new technologies on the microfinance sector. Additionally, it recognizes the high demands which the state makes on microfinance institutions and discusses the need and relevance of new policy regulations. Complementing these analyses, statistical annexes provide essential data on the sector, strengthening its utility as a reference document. It contains extensive original material, and yet draws widely on the findings of other recent studies and reports, thereby emerging as a complete, detailed analysis of the status and the future of the microfinance sector in India.

*World's Columbian Exposition 1893, Chicago* Jan 15 2022

**Handbook of Hydrogen Storage** Jun 27 2020 Owing to the limited resources of fossil fuels, hydrogen is proposed as an alternative and

environment-friendly energy carrier. However, its potential is limited by storage problems, especially for mobile applications. Current technologies, as compressed gas or liquefied hydrogen, comprise severe disadvantages and the storage of hydrogen in lightweight solids could be the solution to this problem. Since the optimal storage mechanism and optimal material have yet to be identified, this first handbook on the topic provides an excellent overview of the most probable candidates, highlighting both their advantages as well as drawbacks. From the contents:  $\zeta$  Physisorption  $\zeta$  Clathrates  $\zeta$  Metal hydrides  $\zeta$  Complex hydrides  $\zeta$  Amides, imides, and mixtures  $\zeta$  Tailoring Reaction Enthalpies  $\zeta$  Borazan  $\zeta$  Aluminum hydride  $\zeta$  Nanoparticles A one-stop reference on all questions concerning hydrogen storage for physical and solid state chemists, materials scientists, chemical engineers, and physicists.

**Space Physics and Aeronomy, Magnetospheres in the Solar System** Nov 25 2022 Überblick über den aktuellen Wissensstand und künftige Forschungsrichtungen in der Magnetosphärenphysik In den sechs Jahrzehnten seit der Einführung des Begriffs "Magnetosphäre" sind über den magnetisierten Raum, der jeden Körper in unserem Sonnensystem umgibt, viele Theorien entstanden und viele Erkenntnisse gewonnen worden. Jede Magnetosphäre ist einzigartig und verhält sich doch entsprechend den universellen physikalischen Vorgängen. Der Band "Magnetospheres in the Solar System" enthält Beiträge von Experten für Experimentalphysik, theoretische Physik und numerische Modellierung, die einen Überblick über verschiedene Magnetosphären vermitteln, von der winzigen Magnetosphäre des Merkur bis zu den gewaltigen planetarischen Magnetosphären von Jupiter und Saturn. Das Werk bietet insbesondere: \* Einen kompakten Überblick über die Geschichte der Magnetosphäre, ihre Grundsätze und Gleichungen \* Eine Zusammenfassung der grundlegenden

Prozesse in der Magnetosphärenphysik \* Instrumente und Techniken zur Untersuchung von Prozessen in der Magnetosphäre \* Eine besondere Schwerpunktsetzung auf die Magnetosphäre der Erde und ihre Dynamik \* Eine Darstellung der planetaren Magnetfelder und Magnetosphären im gesamten Sonnensystem \* Eine Definition der künftigen Forschungsrichtungen in der Magnetosphärenphysik Die Amerikanische Geophysikalische Vereinigung fördert die wissenschaftliche Erforschung der Erde und des Weltraums zum Wohle der Menschheit. In ihren Publikationen werden wissenschaftliche Erkenntnisse veröffentlicht, die Forschern, Studenten und Fachkräften zur Verfügung stehen.

Tunnelling in Molecules Oct 24 2022 Quantum tunnelling is one of the strangest phenomena in chemistry, where we see the wave nature of atoms acting in “impossible” ways. By letting molecules pass through the kinetic barrier instead of over it, this effect can lead to chemical reactions even close to the absolute zero, to atypical spectroscopic observations, to bizarre selectivity, or to colossal isotopic effects. Quantum mechanical tunnelling observations might be infrequent in chemistry, but it permeates through all its disciplines producing remarkable chemical outcomes. For that reason, the 21st century has seen a great increase in theoretical and experimental findings involving molecular tunnelling effects, as well as in novel techniques that permit their accurate predictions and analysis. Including experimental, computational and theoretical chapters, from the physical and organic to the biochemistry fields, from the applied to the academic arenas, this new book provides a broad and

conceptual perspective on tunnelling reactions and how to study them. Quantum Tunnelling in Molecules is the obligatory stop for both the specialist and those new to this world.

**Mastering Linux System Administration** Jun 08 2021 Achieve Linux system administration mastery with time-tested and proven techniques In Mastering Linux System Administration, Linux experts and system administrators Christine Bresnahan and Richard Blum deliver a comprehensive roadmap to go from Linux beginner to expert Linux system administrator with a learning-by-doing approach. Organized by do-it-yourself tasks, the book includes instructor materials like a sample syllabus, additional review questions, and slide decks. Amongst the practical applications of the Linux operating system included within, you'll find detailed and easy-to-follow instruction on: Installing Linux servers, understanding the boot and initialization processes, managing hardware, and working with networks Accessing the Linux command line, working with the virtual directory structure, and creating shell scripts to automate administrative tasks Managing Linux user accounts, system security, web and database servers, and virtualization environments Perfect for entry-level Linux system administrators, as well as system administrators familiar with Windows, Mac, NetWare, or other UNIX systems, Mastering Linux System Administration is a must-read guide to manage and secure Linux servers.

**Autonomous Vehicle Technology** Feb 28 2023 Autonomous vehicle technology has the potential to significantly improve social welfare. This report addresses the numerous legislative, regulatory, and liability issues this technology will raise.
