Accounting Standards Mar 08 2021 "The eighteenth edition of Accounting Standards is intended for Financial Accounting second- or third-year students or students requiring an introduction to accounting standards. It introduces students to the principles of the International Financial Reporting Standards (IFRS). The accounting principles are illustrated through questions which gradually increase in difficulty. This approach facilitates students' understanding of these principles and enables them to get to grips with financial statements in a practical manner. An indication is given when a question contains topics that are not in the revised SAICA syllabus, but may be relevant for other syllabi or for the further enrichment of students' understanding. Accounting Standards is designed to meet students' requirements while at the same time reducing the lecturers' workload. Solutions to all the questions are provided to

lecturers at prescribing institutions"--Publisher's description.

Accounting Principles and Practice Aug 13 2021 Accounting Principles and Practice describes the principles and conventions which provide the structure of Accounting practice. Many of the questions are taken from the past examinations of the Royal Society of Arts, the Association of Certified and Corporate Accountants, the Society of Incorporated Accountants, and the Institute of Chartered Accountants. This book is divided into 19 chapters and begins with a brief introduction to the double entry system of accounting. Considerable chapters are devoted to the Accounting techniques concerning the management of different

types of accounts, receipts, payments, and expenditures. Other chapters examine the validity of the principles involved and of the limitations of the conventions. This text is based upon the conviction that the oft-quoted distinction between theory and practice is disastrously misleading. It demonstrates that good theory and good practice are inseparable. This book will prove useful to accountants and accounting students.
