It argues that both proposals undermine the long-term objective of attaining a consolidated European corporate tax regime. It suggests an alternative strategy, which offers a comprehensive formulary-tax-allocation-solution in one of the hard to tax sectors, such as the financial sector. This strategy requires more efforts and political risk-taking, but would better promote the long-term objective of a consolidated EU corporate tax regime. This book provides a comprehensive analysis of the rules governing the taxation of permanent establishments as implemented in the OECD Model Tax Convention and German national tax law. Deviations between the OECD approach and the German approach are identified and modifications to the rules as a result of the Base Erosion and Profit Shifting (BEPS) project are examined. Moreover, challenges imposed to the PE concept as a result of the digitalisation of the economy are identified and discussed. Against this background, the Pillar One Blueprint proposing a long-term solution to overcome the tax challenges arising from the digitalisation of the economy is presented and assessed against widely accepted overarching principles of tax policy. Within the European Union, direct taxation is an area which often provokes controversy due to tensions between the tax sovereignty of the individual Member States and the desire for an integrated internal market. This book offers a critical review of the legislative and case-law developments in this area at the EU level, and reviews the European Commission's proposed solutions in light of their concerns regarding the proper functioning of the EU's internal market. Luca Cerioni set out a series of benchmarks determined from the objectives expressed by the European Commission, including: the elimination of double taxation and double non-taxation; the simplification of cross-border tax compliance; the reduction of abusive forum-shopping practices and general aggressive tax planning strategies; legal certainty for all businesses and individuals carrying on activities and receiving income in more than one EU Member State. Cerioni uses these benchmarks to ask which Directives and/or rulings have left legal uncertainty, and which have ended up creating or increasing the scope for aggressive tax planning. The book puts forward a comprehensive solution for a new optimal regime relating to tax residence, which would contribute to the EU project to the mutual benefit of Member States and taxpayers. As a thorough and critical discussion of EU tax rules in force, and of the European Court's case law in direct taxation, this book will be of great use to academic researchers and students of EU law, tax practitioners, and policy-makers at the EU and national level. *Taxation 2020* introduces all relevant tax topic covered in the CPA exam to undergraduate or graduate students in one-semester introductory tax courses.
