CISM Exam Self-Practice Review Questions for Certified Information Security Manager 2018 Edition (with 180+ Questions) Oct 26 2020 CISM is NOT a pure technical cert. In fact it tends to focus more on the policies/programs and management side of IS. There are technical questions but the questions are not like those that you can find in the MS/Cisco exams. The CISM exam topics cover Governance, Program Development, Program Management, Incident Management and Response ...etc. You need to know the basics of new IT technologies but you also need to know the older technologies since many old stuff are still at work in the modern business world. The CISM exam is NOT an IT exam, although there are many difficult IT questions. The management related questions seem quite vague that it would be uneasy to pick the correct answers without proper management sense (sadly, there isn't much a training material can do to build up one's management sense). We create these self-practice test questions referencing the concepts and principles currently valid in the exam. We focus more on the tech contents to make sure you don't get tripped up by the easy-to-ignore tech details. Each question comes with an answer and a short explanation which aids you in seeking further study information. For purpose of exam readiness drilling, this product includes questions that have varying numbers of choices. Some have 2 while some have 5 or 6. We want to make sure these questions are tough enough to really test your readiness and draw your focus to the weak areas. Think of these as challenges presented to you so to assess your comprehension of the subject matters. The goal is to reinforce learning, to validate successful transference of knowledge and to identify areas of weakness that require remediation. The questions are NOT designed to "simulate" actual exam questions. "realistic" or actual questions that are for cheating purpose are not available in any of our products.
