Getting a book published is hard enough, but what about building a loyal reader base? It's been said that nothing sells a book - to an editor or a reader - faster than a great story. Whether you're a plotter or a pantsier (write by the seat of your pants), Break Into Fiction® is the book that will help you find the weak spots (sagging middles, unlikeable characters, slow pacing and more) in your fiction stories. Editing is key to any story, but it starts with the author. Writing fast means nothing if the final story isn't sound. But the sooner you grasp the power points for a story, the faster you'll be able to build a strong backlist. Now you have a way to improve your writing one easy step at a time. Written by a New York Times and USA Today bestselling novelists, Break Into Fiction® is a workshop-in-a-book and the one resource all writers need to master the art of fiction. This book is based on the popular workshops Mary Buckham and Dianna Love taught in the US and internationally to beginning writers, multi-published authors and even a Pulitzer Prize winner. Their innovative method shows writers how to create

stories of depth, excitement, and emotion with:

- **Easy-to-understand templates that guide the new writer through building a novel and show more experienced writers how to deepen a plot and take a first draft to the next level much more quickly**
- **Reference examples from strongly-plotted popular genre films of suspense, classics, children, and romance**
- **Simple worksheets to build a strong story through Character-Driven™ plotting for any genre**
- **Troubleshooting tips that reveal how to find and fix holes that weaken the plot**
- **Insights from best-selling novelists representing a variety of fiction genres**
- **A bonus dialogue guide that reveals how to make a character come alive through conversation.**

Break Into Fiction® is here to help aspiring-to-bestselling authors with a step-by-step guide! The troubleshooting chapter is invaluable in the event of problems. By the time you've finished, you will have a computer that's tailored to your exact requirements with no superfluous features or functions. This fourth edition covers Windows 8 and 8.1 From the PREFACE of the edition of 1904. Many books have been written on Stairs and Hand-Railing, but so far as my experience extends, one of two objections has prevented them from being universally adopted by the operative workman. First, the books have been written by men who did not seem to think it necessary to begin at the beginning, and first teach the young workman how to build a stair of the humblest sort, and thus lead him, step by step, until he became able, by gradual and natural acquirement, to erect and complete stairs of a better description. This objection, I have found, by close observation and a knowledge of the wants of young workmen, to be fatal to the large sale of any work published on the subject; and though I am fully

aware that to the workman who has, from practical experience in the workshop or in the building, obtained a fair knowledge of stair-building and hand-railing, someone or other of the many excellent works now obtainable is a necessity, and it is not intended that this work will replace the more advanced ones. Yet, I think, that even the advanced stair-builder will be able to find something here that will more than repay for the cost. The second objection I have met with to the books on this subject now in the market, is their high price. Young and struggling workmen cannot afford to pay fancy prices for books they do not understand. GOULD'S AMERICAN STAIR-BUILDER, which is the lowest priced book on the subject published in this country, costs \$3.00; while MONCKTON'S NATIONAL STAIR-BUILDER costs \$5.00, and RIDELL'S UNIVFTRSAL STAIR-BUILDER costs \$7.50; and so it is with CUPPER, DEGRAFF, LOTH and other works. Doubtless, these books, every one of them, are worth the money asked for them, and the advanced workman would not be without a copy of one or the other of them if he had to pay double the market price; but while these books may be invaluable to the advanced stair-builder, they are not at all adapted to the wants of the uninitiated; and are as much out of place on the shelves of the young apprentice as a learned treatise on the lost tribes of Israel would be in the hands of a child struggling with alphabetical word-making. I have tried to avoid both the objections mentioned; first, by presuming that the reader knows nothing about the art of stair-building when he buys this book, and must necessarily commence at the beginning, and work his way up; second, by keeping the cost of the book down to such a price that the poorest apprentice boy may be able to procure it. This book will be followed by another on the same subject, one that will begin where this leaves off, thus enabling; the student to pursue the subject to its highest domain. Of course, it is intended that each work will be complete in itself, and that both works will cover the whole ground of Stair-Building and Hand-Railing. Get an inside look at building a model railroad from start to finish! <http://www.homebuildingandrepairs.com> This is a guide on how to build business systems for entrepreneurs and business managers. This guide does not try to reinvent the wheel on systems design and it does not try to reveal new knowledge on systems. This guide rather focuses on structuring the basic essentials of systems into a framework that can easily and practically be implemented in any business. This guide focuses less on technology but emphasizes on equipping entrepreneurs and business managers with the tools to build systems that can run and grow any business. The guide has been written in the most simple terms with the primary purpose of explaining how the elements of a system work and why they matter to a business. This book is part of a series designed for professionals and do-it-yourselfers to provide them with what I consider to be a simplified step-by-step process for designing and assembling different types of stairs. In the present global context, it is innovation that determines whether a business is gaining a competitive edge over others in shrinking markets. This extremely interesting book breaks the manager's myth that innovation is something outside the organizational framework, and shows how the capability to innovate can be built into the fabric of an organization in eight steps. The author focuses on a model that managers can adopt and implement in their organizations, using case studies and a host of examples that can be easily adapted and translated into practice. With a knowledge-based view of innovation, the author concisely discusses emerging practical concepts in innovation for organizations, including: - knowledge capability - attitudinal capability - creative capability - building blocks of innovation - renewing capabilities The book also includes key takeouts or practical hints for readers and is a fresh and energetic read that will be valuable for senior and middle management executives, professionals in all spheres, entrepreneurs, and management students. marketing materials and methods pay off and which are a waste of time? · How can you exploit social media? · Overcoming your fear of selling: how to sell with integrity · Going for growth: what is involved in building an even bigger business? “Jenny Rogers has the rare ability to offer the lessons of decades of experience in ways which are practical to implement and easy to absorb. This book is comprehensive - offering both high level concept and lots of important details on the kinds of things that differentiate the successful coaching professional from the crowd. Perhaps most importantly she offers proven, thorough answers to critical questions that many people would not even think to ask in setting up or developing their business.” Phil Hayes, Chairman, Management Futures, UK “Another great book from Jenny Rogers. I remember using the first edition of her book very early on in my career and remain hugely grateful for the informed insights and sensible suggestions. As always with Jenny’s books, a new edition does not simply mean a few typos corrected and a couple of new references. In addition to the really helpful sections I remember from the first edition (e.g. on how to manage networking and selling whilst remaining authentic), Jenny has drawn on her experience and the courage to address some of the other really difficult issues that concern new coaches. How much should I charge? How will I find my clients? What training should I do? Even Where should I coach and What should I wear? I train new coaches every year and these are the questions they ask. I will certainly be recommending Jenny’s book - and drawing on it myself to help the coaches on my courses have the best possible start to their careers.” Jane Cook, Managing Director, Linden Learning, UK “In a marketplace crowded with quick fixes and unrealistic promises, this book is a breath of fresh air! Drawing on the author’s extensive experience, this book lays out a sober, practical approach, while also offering encouragement and inspiration. In her warm, compelling style, Jenny Rogers explores the essential steps towards building a sustainable coaching business—from improving your own coaching skills, to developing your brand, to marketing your services with integrity.” Leni Wildflower, PhD, PCC, Knowledge Based Coaching in the Workplace, Fielding Graduate University, USA “This book is a must read for anyone who wants to earn a living through coaching. Jenny combines natural enthusiasm and positivity with a good dose of realism by applying a pragmatic and sometimes humorous lens to the business of coaching. No matter how experienced you are in running a coaching business, there is

something in this book for everyone - from pragmatic hints and tips at start up stage through to some insightful checks and balances to ensure a consistently high service from established businesses. Jenny demonstrates a real depth of understanding about the questions that will/should be at the forefront of the minds of many new coaches about to set up in business. She has generated in depth answers, pragmatic lists of best practice and sound advice. Her sound advice will help pave the way to your success as a coach.” Susan Binnarsley, MD h2h resources limited, UK “I must admit when I picked up this book I wondered how Jenny could improve on her original book Developing a Coaching Business, however Building a Coaching Business is the essential guide for starting, growing and sustaining a business. Tailored to coaching, it provides a step-by-step guide full of tested methods, insight, ideas and practical information, and written in Jenny’s engaging style. Her facilitative approach to selling is a gift. Having come from the public sector selling was one of my biggest challenges but when I use the facilitative model I feel confident and professional. This is a book that challenges and inspires, and you will find yourself recommending it to other people, who may not even be coaches.” Margaret Kelly, Executive Coach, Margaret Kelly Consulting, UK & Ireland “If those of my colleagues who decided to change their careers and set up a coaching business had got at the right time access to this book, it would have been so much easier for them. To take into consideration all the practical issues as well as read about the newest trends and most effective approaches to such areas as selling. To have a wide perspective and yet remember that the devil is the detail. Knowing all this can shorten the route to success, at the same making the expectations more realistic. It is an obvious must for anybody who wants to build a coaching business. But I would also recommend this inspiring and comprehensive book to anybody who thinks of different options in their professional life.” Dorota Porazka, Vice-President of the Board, DORADCA Consultants Ltd, Poland “I strongly recommend this book. Jenny Roger addresses what one needs to know and be aware of for building and developing a coaching business. It is written in a down-to-earth, straight to the point, yet insightful and comprehensive way. Jenny doesn’t avoid the uncomfortable questions, either mitigates what needs to be said and to be ponder. If you are serious about your coaching business and your coaching practice then this book is a must-have (and to pursue!!).” Ana Oliveira Pinto, Executive Coach, Portugal “This book is a must for coaches wanting business

success. It gives executive coaches like me business savvy solutions to overcome things like the dread of networking. The best bit is the section on facilitative selling because it gives me a new and more authentic way to sell my services. The book is written in a warm, wise style with a wealth of practical advice and insights. It feels like Jenny is in the room coaching you - just without the coffee!" Jacqui Harper, INSEAD lecturer, Communication Coach, Author, Speaker "This beautifully written book is a must-read for anyone wanting to build a coaching business. It's chock full of wisdom from someone who's been at the top of her profession for the last two decades. I read it when starting my business and remain indebted to it but now it's been substantially updated to reflect changes in the market and developments such as social media. If you feel daunted by the prospects of setting up a company, developing a brand, selling, networking or any of the myriad skills you need to be successful then I suggest you buy this book." Mark Wakefield, Director, Vogel Wakefield, the counter-consultancy, UK "A clear, systematic and down-to-earth primer on how to start, build and maintain a professional coaching business. After many years as a coach, I still find myself inspired by many of the ideas in this book. And she commendably grasps the nettle of coaching fees, for which new coaches should be very grateful!" Clare Brigstocke, Executive Coach, Lateralshift "Jenny Rogers' earlier Developing a Coaching Business has been a mainstay for Meyler Campbell Graduates for years, but this new version is even better. It has all the crucial basics, plus vital new material on quality, brand differentiation, integrity, and being future-ready. Warm, practical and honest, the book's wealth of tips, useful checklists, and an excellent section on fees, should accelerate your business growth. From the lessons of a simple sandwich, to Enron, to coaching businesses' stages of growth, it's all here - invaluable." Daniel Burke, Chairman, Meyler Campbell This book is a down to earth, practical guide which provides ten simple steps for success for anyone responsible for recruiting a winning veterinary practice team: whether they are recruiting employees and building their team, or changing culture and creating a supportive environment where employees are engaged and motivated. It is ideal for small business owners who can't afford to employ any human resource support. Intensely practical, it delivers key facts for veterinary staff starting out in business. With the help of this groundbreaking book, you can take the guesswork out of parenting and be assured that you are building not only a strong family -- but a fantastic family. Based on the largest study ever done on strong families -- 14,000 families studied over twenty-five years -- this book reveals six simple, yet profound, steps to building a fantastic family that will thrive for generations to come. Excerpt from Stair-Building Made Easy: Being a Full and Clear Description of the Art of Building the Bodies, Carriages and Cases for All Kinds of Stairs and Steps; Together With Illustrations Showing the Manner of Laying Out Stairs, Forming Treads and Risers, Building Cylinders, Preparing Stri Many books have been written on Stairs and Hand-Railing, but so far as my experience extends, one of two objections has prevented them from being universally adopted by the operative workman. First, the books have been written by men who did not seem to think it necessary to begin at the beginning, and first teach the young workman how to build a stair of the humblest sort, and thus lead him, step by step, until he became able, by gradual and natural acquirement, to erect and complete stairs of a better description. This objection, I have found, by close observation and a knowledge of the wants of young workmen, to be fatal to the large sale of any work published on the subject; and though I am fully aware that to the workman who has, from

practical experience in the workshop or in the building, obtained a fair knowledge of stair-building and hand-railing, some one or other of the many excellent works now obtainable is a necessity, and it is not intended that this work will replace the more advanced ones. Yet, I think, that even the advanced stair-builder will be able to find something here that will more than repay for the cost. The second objection I have met with to the books on this subject now in the market, is their high price. Young and struggling workmen cannot afford to pay fancy prices for books they do not understand. Gould's American Stair-Builder, which is the lowest priced book on the subject published in this country, costs \$3.00; while Monckton's National Stair-Builder costs \$5.00, and Riddell's Universal Stair-Builder costs \$7.50; and so it is with Cupper, Degraff, Loth and other works.
