The Well-Trained Mind: A Guide to Classical Education at Home (Fourth Edition) Aug 25 2022 Is your child getting lost in the system, becoming bored, losing his or her natural eagerness to learn? If so, it may be time to take charge of your child's education—by doing it yourself. The Well-Trained Mind will instruct you, step by step, on how to give your child an academically rigorous, comprehensive education from preschool through high school—one that will train him or her to read, to think, to understand, to be well-rounded and curious about learning. Veteran home educators Susan Wise Bauer and Jessie Wise outline the classical pattern of education called the trivium, which organizes learning around the maturing capacity of the child's mind and comprises three stages: the elementary school "grammar stage," when the building blocks of information are absorbed through memorization and rules; the middle school "logic stage," in which the student begins to think more analytically; and the high-school "rhetoric stage," where the student learns to write and speak with force and originality. Using this theory as your model, you'll be able to instruct your child—whether full-time or as a supplement to classroom education—in all levels of reading, writing, history, geography, mathematics, science, foreign languages, rhetoric, logic, art, and music, regardless of your own aptitude in those subjects. Thousands of parents and teachers have already used the detailed book lists and methods described in *The Well-Trained Mind* to create a truly superior education for the children in their care. This extensively revised fourth edition contains completely updated curricula and book lists, links to an entirely new set of online resources, new material on teaching children with learning challenges, cutting-edge math and sciences recommendations, answers to common questions about home education, and advice on practical matters such as standardized testing, working with your local school board, designing a high-school program, preparing transcripts, and applying to colleges. You do have control over what and how your child learns. *The Well-Trained Mind* will give you the tools you'll need to teach your child with confidence and success.

Teaching Race and Anti-Racism in Contemporary America Feb 04 2021 This book presents thoughtful reflections and in-depth, critical analyses of the new challenges and opportunities instructors face in teaching race during what

has been called the “post-racial era”. It examines the racial dimensions of the current political, economic, and cultural climate. The book features renowned scholars and experienced teachers from a range of disciplines and offers successful strategies for teaching important concepts through case studies and active learning exercises. It provides innovative strategies, novel lesson plans and classroom activities for college and university professors who seek effective methods and materials for teaching about race and racism to today’s students. A valuable handbook for educators, this book should be required reading for all graduate students and college instructors.

Finite Mathematics, Models, and Structure Jul 12 2021 Still another book on finite math? Why? Hasnt everything that should have been said been said? No, I would argue. The shortcoming that troubles me most about the books I am familiar with is their failure to provide perspective on what math technique and the use of technology can do for us and its limitations. This can only be addressed through vigorous and sustained use of the mathematical modeling perspective, which is a hallmark of this books exposition. A point continually stressed is that reaching a mathematical answer to a problem is not the end of the story. It is in a sense the end of a chapter, but the next chapter is concerned with questions about whether and how the mathematical answer should be implemented. Also addressed is the question of what to consider when more than one answer is obtained for a problem.

Third Grade Handwriting Paper Jul 24 2022 Don't be fooled by other blank handwriting papers that offer multiple grade levels in one book. Just like kids in different grades need different sized clothes, each grade level requires handwriting paper with different sized lines, especially for younger children or those that are struggling with handwriting. Our age-appropriate blank handwriting paper for Third Grade students is the traditional 1/2 inch ruled horizontal paper with a dotted midline. This larger, educationally sound, developmental design will help your child learn handwriting without the frustration of having to write too small, too soon. If your child has difficulty fitting letters to the page or writing on the lines, consider using the handwriting practice paper one grade level below instead for a while as it will provide bigger spaces and lines. Little hands need bigger spaces for better practice. Try our time tested blank handwriting paper and experience Low Stress-Teaching Success with workbooks by Peachy Keen Products.
